Solutions – Chapter 5

Ethical & Societal Issues

The NSA Tackles Big Data

Discussion Questions

1. NSA has been collecting phone numbers, call location, duration, and times of all calls made each day within the United States and between the United States and other countries. They also collect data from Microsoft, Yahoo!, Google, Facebook, Paltalk, AOL, Skype, YouTube, and Apple.
2. Student responses will vary. The mass collection of data by the NSA was ruled legal by a federal judge.

Critical Thinking Questions

1. Once the data is collected, the NSA runs graph analyses to find whom a suspected terrorist has been in contact with, when they have been in contact with these individuals, how often, and where they and their contacts are located.
2. Student responses will vary. The fear with this type of analysis is that the government is targeting individuals without having probable cause, thus violating the Fourth Amendment. Furthermore, many people and organizations feel that collecting this data compromises individuals' right to privacy.
