The fresco covers the vast surface of the ceiling in the main hall of Palazzo Barberini and was painted by Pietro da Cortona between 1622 and 1629, with an interruption in 1617 when the painter travelled to Florence and northern Italy. As attested by the documents, for this grandiose undertaking Cortona received the very substantial sum of 2000 scudi and was consecrated as the inventor of a new figurative language, the Baroque. The conceptual basis of the complex decorative program is the allegorical poem *L'visione di Urbano Papa VII* by the humanist from Pistoia Francesco Bracciolini (1566–1645), secretary of the cardinal nephew Antonio Barberini, published in 1628 with suggestions from the pope-pope himself. The subject illustrates the plans of Divine Providence for the election of Urban VIII and its beneficial effects on the Papal States. With sophisticated inventions that transform conceptual allegories into harmonious images—animating the surface of the vault with warm and bright colors and lively, massive, and dynamic figures—Pietro da Cortona succeeded in fusing mythology with epic, Roman history, legend and fable, bringing conceptual ideas to life in the form of symbolic characters and projecting ancient history onto the present. The painter broadened the widths of the pastiche to the extent that the fresco has the appearance of a poem structured

like a figurative epic, derived from classical themes but aimed at the present.

In a Rome shaken by the unrest that ensued when the papal throne was left vacant after the death of Gregory XV, the eternal struggle between vices and virtues unfolds, but it is a game and an artificial expedient: the outcome is already written thanks to the providential plan that sees in the election of Maffeo Barberini the triumph of peace and prosperity for the Christian people. The painter created fake architectures, a genuine illusionistic system populated by painted statues and adorned with floral festoons, masks, dolphins, chandeliers, and imitation bronze medallions with episodes from Roman history, dividing the space into five sectors in large central panel and four side scenes. This arrangement dilates the structure, ensuring its

National Galleries Simon Knell, 2016-01-22 Are national galleries different from other kinds of art gallery or museum What value is there for the nation in a collection of international masterpieces How are national galleries involved in the construction national art National Galleries is the first book to undertake a panoramic view of a type of national institution which are sometimes called national museums of fine art that is now found in almost every nation on earth Adopting a richly illustrated globally inclusive comparative view Simon Knell argues that national galleries should not be understood as great galleries but as peculiar sites where art is made to perform in acts of nation building A book that fundamentally rewrites the history of these institutions and encourages the reader to dispense with elitist views of their worth Knell reveals an unseen geography and a rich complexity of performance He considers the ways the national galleries entangle art and nation and the differing trajectories and purposes of international and national art Exploring galleries artists and artworks from around the world National Galleries is an argument about how we think about and study these institutions Privileging the situatedness of each national gallery performance and valuing localism over universalism Knell looks particularly at how national art is constructed and represented He ends with examples that show the mutability of national art and by questioning the necessity of art nationalism **Catalogue of the Library of the National Gallery of Canada: Has** National Gallery of Canada.
