Tests That Teach Karen Tankersley, 2010-06-22 Now that the No Child Left Behind Act has left its mark on public education educators across the United States are all the more invested in preparing their students for state and national assessments In *Tests That Teach Using Standardized Tests to Improve Instruction* Karen Tankersley guides you with proven tips and instructional strategies to help your students perform to their potential Covering all core contents areas language arts social studies math and science and respecting all levels of student performance Tankersley Examines the various types of questions that routinely appear on these assessments Provides sample multiple choice and constructed response questions from the tests Offers guidelines on how to create daily lessons that encourage students to practice the skills and demonstrate the knowledge they ll need to use on the high stakes tests Suggests word lists games discussion topics and testing ideas for your classroom and Describes how school staff can create a learning community that fosters collaboration among teachers and high performance in students Also included are a wealth of online resources for lesson plans daily classroom activities and virtual field trips as well as links to every state s released materials on its own assessment As Tankersley explains teaching students the skills they need to do well on constructed response tests will better prepare students both to score well on state and national assessments and to take their place as thoughtful and organized thinkers in a rapidly changing competitive society [Large-Scale Studies in Mathematics Education](#) James A. Middleton, Jinfa Cai, Stephen

Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomic local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies [Practical Considerations in Computer-Based Testing](#) Cynthia G.

Parshall, Judith A. Spray, John Kalohn, Tim Davey, 2012-12-06 This book introduces computer based testing addressing both nontechnical and technical considerations The material is oriented toward practitioners and graduate students The practical emphasis will be useful to measurement professionals who are or will be responsible for implementing a computerized testing program The instructional information is also designed to be suitable for a one semester graduate course in

computerized testing in an educational measurement or quantitative methods program While certain theoretical concepts are addressed the focus of the book is on the applied nature of computerized testing For this reason the materials include such features as example applications figures and plots to illustrate critical points in the discussions A wide range of nontechnical issues need to be considered in implementing a computer based testing program Separate chapters are provided on test administration and development issues examinee issues software issues and innovative item types Test administration and delivery issues include the location of exam administration selection of hardware and software security considerations scheduling of administration frequency and time limits cost implications and program support as well as approaches for addressing reliability validity comparability and data analysis Examinee issues include the influence of examinees reactions to adaptive testing the effect of computer based task constraints and the impact of examinees prior computer experience Software issues include usability studies and software evaluation as tools in selecting and developing appropriate software based on the test program needs
