It's About Time N. David Mermin, 2009-07-06 In It's About Time N David Mermin asserts that relativity ought to be an important part of everyone's education after all it is largely about time a subject with which all are familiar The book reveals that some of our most intuitive notions about time are shockingly wrong and that the real nature of time discovered by Einstein can be rigorously explained without advanced mathematics This readable exposition of the nature of time as addressed in Einstein's theory of relativity is accessible to anyone who remembers a little high school algebra and elementary plane geometry The book evolved as Mermin taught the subject to diverse groups of undergraduates at Cornell University none of them science majors over three and a half decades Mermin's approach is imaginative yet accurate and complete Clear lively and informal the book will appeal to intellectually curious readers of all kinds including even professional physicists who will be intrigued by its highly original approach **Agents and Peer-to-Peer Computing** Sam Joseph, Zoran Despotovic, Moro Gianluca, Sonia Bergamaschi, 2010-01-12 This book constitutes the thoroughly refereed post workshop proceedings of the 6th International Workshop on Agents and Peer to Peer Computing AP2PC 2007 held in Honolulu Hawaii USA in May 2007 in the context of the 6th International Joint Conference on Autonomous Agents and Multi

Agent Systems AAMAS 2007 The 8 revised full papers presented together with 1 summary paper were carefully reviewed and selected from 14 initial submissions they are fully revised to incorporate reviewers comments and discussions at the workshop The volume is organized in topical sections on agent and peer trust performance and testing grid and distributed computing as well as location and search services
