

Problem 1 – Mathematics (Analytic Geometry)

Find the distance from the point (5, -3) to the line $7x - 4y - 28 = 0$.

Solution:

$$d = \frac{Ax_1 + By_1 + C_1}{\sqrt{A^2 + B^2}}$$

$$d = \frac{(-) (7x_1 - 4y_1 + 28)}{(-) \sqrt{(7)^2 + (-4)^2}}$$

$$d = \frac{7(5) - 4(-3) - 28}{\sqrt{65}}$$

$$d = 2.36$$

Problem 2 – Mathematics (Analytic Geometry)

Find the area bounded by the line $2x - y + 10 = 0$ and the coordinate axes.

Solution:

$$2x - y + 10 = 0$$

$$\begin{array}{ll} \text{when } x = 0 & y = 10 \\ & x = -5 \end{array}$$

$$A = \frac{5(10)}{2}$$

$$A = 25$$

 Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and
 Their Applications,Committee on Analytical Research Foundations for the Next-Generation Electric Grid,2016-05-15
 Electricity is the lifeblood of modern society and for the vast majority of people that electricity is obtained from large
 interconnected power grids However the grid that was developed in the 20th century and the incremental improvements
 made since then including its underlying analytic foundations is no longer adequate to completely meet the needs of the 21st
 century The next generation electric grid must be more flexible and resilient While fossil fuels will have their place for
 decades to come the grid of the future will need to accommodate a wider mix of more intermittent generating sources such
 as wind and distributed solar photovoltaics Achieving this grid of the future will require effort on several fronts There is a
 need for continued shorter term engineering research and development building on the existing analytic foundations for the
 grid But there is also a need for more fundamental research to expand these analytic foundations Analytic Research
 Foundations for the Next Generation Electric Grid provide guidance on the longer term critical areas for research in
 mathematical and computational sciences that is needed for the next generation grid It offers recommendations that are

designed to help direct future research as the grid evolves and to give the nation's research and development infrastructure the tools it needs to effectively develop test and use this research
