Decoding the Hand Alison Bashford, 2025-12-23 The astonishing history of palmistry and biometrics from occult physicians to the very foundations of modern science and medicine Why did Isaac Newton read books on chiromancy the occult science of hand reading that revealed the secrets of the soul Why did Charles Darwin claim that the hand gave humans dominion over all other species Why did psychoanalyst Charlotte Wolff climb into the primate cages of the London Zoo taking hundreds of delicate palm prints Why did Francis Galton the father of fingerprinting take palm prints too And why did world leading geneticists study the geometry of palm lines in their search for the secrets of chromosomal syndromes Decoding the Hand is an astounding history of magic medicine and science of an enduring search for how our bodily surfaces might reveal an inner self a soul a character an identity From sixteenth century occult physicians influenced by the Kabbalah to twentieth century geneticists and from criminologists to eugenicists award winning historian Alison Bashford takes us on a remarkable journey into the strange world of hand readers revealing how signs on the hand its shape lines marks and patterns have been elaborately decoded over the centuries Sometimes learned sometimes outrageously deceptive sometimes earnest and more often than we ever expected medically and scientifically trained these palm readers of the past prove to be essential links in the human quest to peer into bodies souls minds and selves Not only for fortune telling palmists were the future and the past health and character laid bare in the hand but for other experts in bodies and minds as well anatomists psychiatrists embryologists primatologists evolutionary biologists geneticists and more Drawing telling parallels between the divination promised by palmistry and the appeal to self knowledge offered by modern genetic testing Decoding the Hand also makes clear that palm reading is far from a relic or simple charlatanism Bashford's sagacious history of human hands touching and connecting opens wide the essential human pursuit of what lies within and beyond

places humans in the broad context of the evolution of life emphasizing the critical role of genetic and non genetic forms of information in living systems as well as how changes in the storage transmission and translation of information underlie major transitions in evolution He also draws on information and complexity theory to explain the emergence of Homo sapiens in Africa several hundred thousand years ago and the rapid and unprecedented spread of our species into a variety of environments in Australia and Eurasia including the Arctic and Beringia beginning between 75 000 and 60 000 years ago This magisterial work will appeal to all with an interest in the ever fascinating field of human evolution The Evolution of the Primate Hand Tracy L.
