Corpses in Belgian Anatomy, 1860-1914 Tinne Claes, 2019-11-20 This book tells the story of the thousands of corpses that ended up in the hands of anatomists in the late nineteenth and early twentieth centuries Composed as a travel story from the point of view of the cadaver this study offers a full blown cultural history of death and dissection with insights that easily go beyond the history of anatomy and the specific case of Belgium From acquisition to disposal the trajectories of the corpse changed under the influence of social policies ideological tensions religious sensitivities cultures of death and broader changes in the field of medical ethics Anatomists increasingly had to reconcile their ways with the diverse meanings that the dead body held To a certain extent as this book argues they started to treat the corpse as subject rather than object Interweaving broad historical evolutions with detailed case studies this book offers unique insights into a field dominated by Anglo American perspectives evaluating the similarities and differences within other European contexts *Introductory Lecture Before the Anatomical Class of the University of Pennsylvania* William E. women's deathbed scenes suicides murders funerals and autopsies in literature and other nineteenth century media As such the chapters in *Death Becomes Her* show how the authorial and readerly interest in scripting and staging women's deaths is both intricate and abiding They tell us that death is never of course simply about death and they make relevant other issues from linguistics to politics as they inform the literature and lives of women from the late eighteenth to early twentieth century America Taken together the pieces in *Death Becomes Her* allow us greater access to the surrounding culture out of which the American woman emerges performs lives and dies In doing so they offer fresh insight into the often unsettling and highly relevant role of death in feminism
