Anatomy Of A Great Deception Movie 2008:

The Boko Haram Reader Abdulbasit Kassim, Michael Nwankpa, 2018-07-01 An indispensable treasure trove of documentary evidence accounting for the rise of Boko Haram and the internal splits that emerged along Obituaries in the Performing Arts, 2019 Harris M. Lentz III, 2020-10-28 The entertainment world lost many notable talents in 2019 including television icon Doris Day iconic novelist Toni Morrison groundbreaking director John Singleton Broadway starlet Carol Channing and lovable Star Wars actor Peter Mayhew Obituaries of actors filmmakers musicians producers dancers composers writers animals and others associated with the performing arts who died in 2019 are included in this edition Date place and cause of death are provided for each along with a career recap and a photograph Filmographies are given for film and television performers **Liquid Criminology** Michael Hviid Jacobsen, Sandra Walklate, 2016-06-17 This book explores the ways in which criminological methods can be imaginatively deployed and developed in a world increasingly characterized by the blurred nature of social reality Whilst recognizing the importance of positivist approaches and research techniques it advocates a commitment to understanding the ways in which those techniques can be used imaginatively at times in combination with less conventional methods discussing the questions concerning risk ethics and access that arise as a result Giving voice to cutting edge research practices both in terms of concepts and methods that shift the criminological focus towards the kind of imaginative work that comprised the foundations of the discipline it calls into question the utility and credentials of mainstream work that fails to serve the discipline itself or the policy questions allied to it A call not to give up on numbers but also not to be defined by statistics and the methods that produce them Liquid Criminology sheds light on a way of doing research for criminology that is not only creative but also critical As such it will appeal to scholars of sociology criminology and social policy with interests in research methods and design **Neoliberalism and the Moral Economy of Fraud** David Whyte, Jörg Wiegatz, 2016-05-26 There is evidence that economic fraud has in recent years become routine activity in the economies of both high and low income countries Many business sectors in today's global economy are rife with economic crime Neoliberalism and the Moral Economy of Fraud shows how neoliberal policies reforms ideas social relations and practices have engendered a type of sociocultural change across the globe which is facilitating widespread fraud This book investigates the moral worlds of fraud in different social and geographical settings and shows how contemporary fraud is not the outcome of just a few bad apples Authors from a range of disciplines including sociology anthropology and political science social policy and economics employ case studies from the Global North and Global South to explore how particular values morals and standards of behaviour rendered dominant by neoliberalism are encouraging the proliferation of fraud This book will be indispensable for those who are interested in political economy development studies economics anthropology sociology and criminology Zizek and Law Laurent de Sutter, 2015-03-05 The very first book dedicated to Slavoj Zizek's theoretical treatment of law this book gathers widely recognized Zizek scholars as well as legal

theorists to offer a sustained analysis of the place of law in Žižek's work. Whether it is with reference to symbolic law, psychoanalytical law, religious law, positive law, human rights, to Lacan's, Hegel's or Kant's philosophies of law, or even to Jewish or Buddhist law, Žižek returns again and again to law. And what his work offers this volume demonstrates is a radically new approach to law and a rethinking of its role within the framework of radical politics. With the help of Žižek himself, who here and for the first time directly engages with the topic of law, this collection provides an authoritative account of Žižek and law. It will be an invaluable resource for researchers and students in the fields of law, legal theory, legal philosophy, political theory, psychoanalysis, theology, and cultural studies.

Haunting Inquiry Robert Nellis, 2009-01-01. The NFB's mandate is to make and distribute films designed to help Canadians in all parts of Canada to understand the ways of living and the problems of Canadians in other parts. NFB Founding Commissioner John Grierson: "It's only by our lack of ghosts we're haunted." Canadian poet Earle Birney. *Haunting Inquiry*, Classic NFB Documentary. Jacques Derrida and the Curricular. Otherwise reintroduces significant if sometimes forgotten National Film Board of Canada documentaries into contemporary curriculum conversation. Author Robert Christopher Nellis employs an inflection of Derridean deconstruction to mobilize historical, political, and intellectual themes emerging from the films as elliptical curricular opportunities. The work explores hauntings in and around the documentaries to open toward Others, neither fully present nor absent within the Canadian imagination. They remain troublingly illicit, as is the character of haunting. This book's contribution to the literature of curriculum is a unique and innovative conceptual framework, reintroduction of many classic NFB documentaries, and the use of a productive language and outlook to mobilize fresh perspectives and hopeful possibilities.

The Twentieth-Century American Fiction Handbook Christopher MacGowan, 2011-02-21. THE TWENTIETH CENTURY AMERICAN FICTION. Accessibly structured with entries on important historical contexts, central issues, key texts, and the major writers, this Handbook provides an engaging overview of twentieth-century American fiction. Featured writers range from Henry James and Theodore Dreiser to contemporary figures such as Joyce Carol Oates, Thomas Pynchon, and Sherman Alexie, and analyses of key works include *The Great Gatsby*, *Lolita*, *The Color Purple*, and *The Joy Luck Club*, among others. Relevant contexts for these works, such as the impact of Hollywood, the expatriate scene in the 1920s, and the political unrest of the 1960s, are also explored, and their importance discussed. This is a stimulating overview of twentieth-century American fiction, offering invaluable guidance and essential information for students and general readers.

Techniques of Illusion Katharina Rein, 2023-05-03. This book explores stage conjuring during its golden age from about 1860 to 1910. This study provides close readings highlighting four paradigmatic illusions of the time that stand in for different kinds of illusions typical of stage magic in the golden age and analyses them within their cultural and media historical context: Pepper's Ghost, the archetypal mirror illusion; *The Vanishing Lady*, staging a teleportation in a time of a dizzying acceleration of transport; the levitation, simulating weightlessness with the help of an extended steel machinery; and *The Second Sight*, a mind-reading illusion using

up to date communication technologies These close readings are completed by writings focusing on visual media and expanding the scope backwards and forwards in time roughly to 1800 and to 2000 This exploration will be of great interest to students and scholars in theatre and performance studies

restores these once notorious cases to vivid dramatic life Precarious Flânerie and the Ethics of the Self in Contemporary Anglophone Fiction Eva Ries,2022-06-21 Even though the literary trope of the fl neur has been proclaimed dead on several occasions it still proves particularly lively in contemporary Anglophone fiction This study investigates how fl nerie takes a belated ethical turn in its more recent manifestations by negotiating models of ethical subjectivity Drawing on Michel Foucault s writings on the aesthetics of existence as well as Judith Butler s notion of precariousness as *conditio humana* it establishes a link between post sovereign models of subject formation and a paradoxical constellation of fl nerie which surfaces most prominently in the work of Walter Benjamin By means of detailed readings of Ian McEwan s *Saturday* Siri Hustvedt s *The Blindfold* Teju Cole s *Open City* Dionne Brand s *What We All Long For* and Robin Robertson s *The Long Take Or a Way to Lose More Slowly* this book traces how the ambivalence of fl nerie and its textual representation produces ethical norms while at the same time propagating the value of difference by means of disrupting societal norms of sameness *Precarious Fl nerie and the Ethics of the Self in Contemporary Anglophone Fiction* thus shows that the fl nerie text becomes a medium of ethical critique in post postmodern times **The 21st Century Superhero** Richard J. Gray II,Betty Kaklamanidou,2011-09-07 Superhero films are one of the most enduring genres of cinema and their popularity is only increasing in the 21st century These ten critical essays explore the phenomenon through the lenses of numerous academic disciplines and cover topics such as the role of globalization in the formation of superhero narratives the shifting nature of masculinity and femininity in the superhero world and the state of the genre today Of particular interest is the way these narratives however fantastic abstract futuristic or simplistic resonate with specific events in the world and function as starting points for discussion of contemporary sociopolitical conflicts **Progress in Episodic Memory Research** Ekrem Dere,Armin Zlomuzica,Angelica Staniloiu,Hans J. Markowitsch,2016-05-25 Episodic memory refers to the ability to remember personal experiences in terms of what happened and where and when it happened Humans are also able to remember the specific perceptions emotions and thoughts they had during a particular experience This highly sophisticated and unique memory system is extremely sensitive to cerebral aging neurodegenerative and neuropsychiatric diseases The field of episodic memory research is a continuously expanding and fascinating area that unites a broad spectrum of scientists who represent a variety of research disciplines including neurobiology medicine psychology and philosophy Nevertheless important questions still remain to be addressed This research topic on the Progress in Episodic Memory Research covers past and current directions in research dedicated to the neurobiology neuropathology development measurement and treatment of episodic memory *The Psychology of Magic and the Magic of Psychology* Amir Raz,Jay A. Olson,Gustav Kuhn,2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of

mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians have a large and robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception

Visual and Multimodal Communication Charles Forceville, 2020 Successful communication requires optimal relevance to the target audience Relevance theory provides an excellent model based on this insight but until now the impact of the theory has been restricted due to an almost exclusive focus on spoken face to face communication Visual and Multimodal Communication is the first

book to systematically demonstrate how relevance theory can fulfill its promise to develop into an inclusive theory of communication This book explains how relevance theory can be adapted to accommodate mass communicative messages in pictograms advertisements cartoons and comics paving the way for a theory of communication covering different modes media and genres
