

Skills Worksheet

Reinforcement

Placing All Your Elements on the Table

Complete this worksheet after you have finished reading the section "Grouping the Elements."

You can tell a lot about the properties of an element just by looking at the element's location on the periodic table. This worksheet will help you better understand the connection between the periodic table and the properties of the elements. Follow the directions below, and use crayons or colored pencils to color the periodic table at the bottom of the page.

1. Color the square for hydrogen yellow.
2. Color the groups with very reactive metals red.
3. Color and label the noble gases orange.
4. Color the transition metals green.
5. Using black, mark the zigzag line that shows the position of the metalloids.
6. Color the metalloids purple.
7. Use blue to color all of the non-metals that are not noble gases.
8. Color the metals in Groups 13–16 brown.
9. Circle and label the actinides in yellow.
10. Circle and label the lanthanides in red.
11. Circle and label the alkali metals in blue.
12. Circle and label the alkaline-earth metals in purple.
13. Circle and label the halogens in green.

Konstantinovich Grigorovich,1989 Very Good No Highlights or Markup all pages are intact **Exploring Science** June Mitchelmore,1999-04 Useful for the first three years of Secondary school this is a three book series It provides an introduction to the world of Science and is a helpful foundation for CXC separate sciences and CXC single award Integrated Science Written in clear English it is suitable for a range of abilities **Computer Games for Learning** Richard E.

Mayer,2014-07-11 A comprehensive and up to date investigation of what research shows about the educational value of computer games for learning Many strong claims are made for the educational value of computer games but there is a need for systematic examination of the research evidence that might support such claims This book fills that need by providing a comprehensive and up to date investigation of what research shows about learning with computer games Computer Games for Learning describes three genres of game research the value added approach which compares the learning outcomes of students who learn with a base version of a game to those of students who learn with the base version plus an additional

feature the cognitive consequences approach which compares learning outcomes of students who play an off the shelf computer game for extended periods to those of students who do not and the media comparative approach which compares the learning outcomes of students who learn material by playing a game to those of students who learn the same material using conventional media After introductory chapters that describe the rationale and goals of learning game research as well as the relevance of cognitive science to learning with games the book offers examples of research in all three genres conducted by the author and his colleagues at the University of California Santa Barbara meta analyses of published research and suggestions for future research in the field The book is essential reading for researchers and students of educational games instructional designers learning game developers and anyone who wants to know what the research has to say about the educational effectiveness of computer games
