Fisheries responses to invasive species in a changing climate Azzurro, E., Bahri, T. (ed.), Valbo-Jørgensen, J. (ed.), Ma, X. (ed.), Strafella, P. (ed.), Vasconcellos, M. (ed.), 2024-07-04 Due to the increasing pressure of a globalized economy and under the effects of a changing climate biological invasions have become a frequent feature of marine and freshwater environments Global fisheries and aquaculture are therefore required to adjust to these changes with the dual aim of reducing the negative ecological consequences caused by these species and making the most of the advantages they might bring Here capitalizing on a wide spectrum of management actions which can be implemented to control and or adapt to aquatic invasions nine measures are presented they can be grouped under environmental social or socioeconomic strategies exploring their potential main challenges and enabling factors The nine measures provided with key recommendations are 1 Develop and manage a commercial fishery 2 Promote recreational harvesting 3 Explore market opportunities 4 Implement outreach programmes 5 Foster stakeholder engagement 6 Implement spatial control 7 Implement biological control 8 Restore ecosystems 9 Do nothing These suggestions discussed among a group of international experts and presented in a synthetic form may be used as a practical resource though not an exhaustive one to aid in the evaluation and identification of appropriate fisheries management responses to aquatic invasive species in the context of climate change While it may not address all the complexities of the subject it provides a starting point for adaptation strategies recognizing the diverse legal cultural and socioeconomic conditions in different fishery contexts offering valuable insights for policymakers fisheries managers and practitioners who have to deal with aquatic invasions

Agricultural Implications of the Fukushima Nuclear Accident (III) Tomoko M. Nakanishi, Martin O'Brien, Keitaro Tanoi, 2019-01-30 This open access book presents the findings from on site research into radioactive cesium contamination in various agricultural systems affected by the Fukushima Daiichi Nuclear Power Plant accident in March 2011 This third volume in the series reports on studies undertaken at contaminated sites such as farmland forests and marine and freshwater environments with a particular focus on livestock wild plants and mushrooms crops and marine products in those environments It also provides additional data collected in the subsequent years to show how the radioactivity levels in agricultural products and their growing environments have changed with time and the route by which radioactive materials entered agricultural products as well as their movement between different components e g soil water and trees within an environmental system e g forests The book covers various topics including radioactivity testing of food products decontamination trials for rice and livestock production the state of contamination in trees mushrooms and timber the dynamics of radioactivity distribution in paddy fields and upland forests damage incurred by the forestry and fishery industries and the change in consumers attitudes Chapter 19 introduces a real time radioisotope imaging system a pioneering technique to visualize the movement of cesium in soil and in plants This is the only book to provide systematic data on the actual change of radioactivity and as such is of great value to all researchers who

wish to understand the effect of radioactive fallout on agriculture In addition it helps the general public to better understand the issues of radio contamination in the environment The project is ongoing the research groups from the Graduate School of Agricultural and Life Sciences of The University of Tokyo continue their work in the field to further evaluate the long term effects of the Fukushima accident **Fishers and Plunderers** Alastair Couper,Hance D. Abuses and slavery at sea are largely missing from narratives of work and environmental exploitation in the mainstream This book shines a light on the exploitation of fish and fishers alike in a global industry driven by profits Conservation and human rights in this industry are huge problems with vast overprovision of vessels and shortages of fish labour costs are targeted and young men are trafficked from poor areas onto vessels in virtual slavery The resultant poverty and debt bonding pushes many towards trafficking drugs and piracy although the criminality linked to the industry extends far beyond the level of the individual vessel or fleet Using first hand testimony and shocking examples of these abuses the book uncovers these crimes and injustices with the authors arguing for regulations which if implemented could protect the rights of fishers across the board **Emerging Challenges and Solutions for Plastic Pollution** Daniel Rittschof,Suresh Valiyaveetil,John

People - Marine Mammal Interactions Andrew Butterworth,Mark P. Simmonds,2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating

OECD Studies on Water Pharmaceutical Residues in Freshwater Hazards and Policy Responses OECD, 2019-11-13 This report calls for a better understanding of the effects of pharmaceutical residues in the environment, greater international collaboration and accountability, distribution and policy actions to prevent and remedy emerging concerns. Laboratory and field tests show traces of oral contraceptives causing the feminisation of fish and amphibians, and residues of psychiatric drugs altering fish behaviour. Antimicrobial resistance linked to the overuse of antibiotics has rapidly escalated into a global health crisis.
