Parasites

Protozoa:

1.1 Identify the structure of protozoa and their, internal, external and parasitic

structure and shape using microscopes, diagrams, video and real images of the human eye. They are presented and compared with other groups in early primary textbooks. Although some bacteria are harmful, most of them cause a useful response for immunity and resistance.

Parasites are tiny organisms which live only inside what usually is a living cell or in much up of a parent organism and surrounded by a protective coat called tegument. Unlike bacteria, viruses only need to escape their defence.

They are also known as parasites because they live only in the host's body. They are also known as parasites because they live only in the host's body. They are also known as parasites because they live only in the host's body.
