Farming Is Not Big Gardening Thomas C. Mueller, 2019-05-14 This book is a light hearted yet informative narrative that discusses agriculture in the United States from a historical social and financial perspective It uses a storytelling technique to share the author s widely varied experiences on food and farming as he sees it Written in a somewhat satirical voice the book contains a wealth of information presented in fast moving easy to read prose

European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union s collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe s dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU s early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies

Managing Health, Safety and Well-Being Aditya Jain, Stavroula Leka, Gerard I.J.M. Zwetsloot, 2018-04-11 To achieve sustainable progress in workplace and societal functioning and development it is essential to align perspectives for the management of health safety and well being Employers are responsible for providing every individual with a working environment that is safe and does not harm their physical or mental health However the current state of the art indicates that approaches used to promote health safety and well being have not had the anticipated results At the level of the enterprise it is widely understood and accepted by all stakeholders that employers share the responsibility of promoting and managing the health of their workers Evidence indicates that most employers put in place procedures and measures to manage workers health and create healthy workplaces to meet legal requirements as a response to requests by employees as a need to improve company image reputation and to improve productivity This highlights that in addition to legal requirements the key drivers for companies also include the ethical and business case While much has been written about role of legislation and the business case for promoting health safety and well being not much is known about the ethical case for promoting employment and working conditions In this context this book examines the potential of the link

between responsible and sustainable workplace practices human rights and worker health safety and well being and explores how complementary approaches can be used to promote employment and working conditions and sustainability at the organizational level It offers a framework for aligning different approaches and perspectives to the promotion of workers health safety and well being and provides recommendations for introducing such an approach at the enterprise level

challenges the notion of macro level power in language policy research and offers evidence that in democratic frameworks macro level power is not absolute. It is not uniform across policy domains but rather susceptible to pressure especially in the domains of healthcare and social welfare. This book makes three important contributions to the theory of language policy by arguing for the need to reconceptualise macro level power. Proposing Categories of Differentiation as a new analytical tool for policy research. Demonstrating that socio political changes are reflected at the textual level. This book is of interest to researchers working on language policies and those investigating language related legislation across different policy domains to practitioners and policymakers in language policy as well as to graduate students conducting comparative policy research. This is a much valued and timely book making a strong case for the subject of language policy across Europe and India. The large comparative case studies of four distinctive states across Europe and India in a simple descriptive mode makes the reading of this book enjoyable. The domains of administration, legislation, healthcare and social welfare are undoubtedly novel ways to deal within the concept of language policy in a wider sense. The author uses discourse analysis to bring out the relationship between intention, explanation and interpretation of a phenomenon like language policy and its implementation. The social diversity as expressed in linguistic mapping is well captured in the novel idea of categories of differentiation both as a normative methodological tool and its historical empirical manifestation. Asha Sarangi, Jawaharlal Nehru University, New Delhi.

Public Health Reports, 2015 **Business, Human Rights and the Environment: The Evolving Agenda**

Chiara Macchi, 2022-04-08. More than ten years after the adoption of the UN Guiding Principles on Business and Human Rights, this book critically reviews the achievements, limits and next frontiers of business and human rights following the protect-respect-remedy trichotomy. The UN Guiding Principles acted as a catalyst for hitherto unprecedented regulatory and judicial developments. The monograph by Macchi proposes a functionalist reading of the state's duty to regulate the transnational activities of corporations in order to protect human rights and adopts a holistic approach to the corporate responsibility to respect, arguing that environmental and climate due diligence are inherent dimensions of human rights due diligence. In the volume, emerging legislations are assessed on mandatory human rights and environmental due diligence as well as the potential and limitations of a binding international treaty on business and human rights. The book also reviews groundbreaking litigation against transnational corporations such as *Lungowe v Vedanta* or *Milieudefensie v Shell* for their human rights and climate change impacts. The book is primarily targeted at academic and non-academic legal experts as well as at researchers and students looking at business and human rights issues through the lenses of legal studies, particularly international law and European law, political sciences, business ethics and management. Additionally, it should also find a readership among practitioners working in the public or private sector, consultants, CSR officers, legal officers etc. willing to familiarize themselves with the expanding areas of liability, financial and reputational risks connected to the social and environmental impacts of global supply chains. Chiara Macchi is currently Lecturer in Law at Wageningen University.
