Algebra Structure Sense Development amongst Diverse Learners Teresa Rojano, 2022-06-07 This volume emphasizes the role of effective curriculum design teaching materials and pedagogy to foster algebra structure sense at different educational levels. Positing algebra structure sense as fundamental to developing students' broader mathematical maturity and advanced thinking, this text reviews conceptual, historical, cognitive, and semiotic factors which influence the acquisition of algebra structure sense. It provides empirical evidence to demonstrate the feasibility of linking algebra structure sense to technological tools and promoting it amongst diverse learners. Didactic approaches include the use of adaptive digital environments, gamification, diagnostic and monitoring tools, as well as exercises and algebraic sequences of varied complexity. Advocating for a focus on both intuitive and formal knowledge, this volume will be of interest to students, scholars, and researchers with an interest in educational research, as well as mathematics education and numeracy. **How to Assess Authentic Learning** Kay Burke, 2009-10-07 Burke has challenged teachers everywhere to raise their standards and design classroom assessments that show evidence of understanding and performance on complex tasks. The expert examples in this book provide teachers with a complete road map so that assessment is truly at the heart of instruction. Diane Ray, Assistant Director for Teacher Leader Development, Professional Association of Georgia Educators. Create assessments that meet state standards and target students' learning needs. In this latest edition of her bestseller, renowned educator Kay Burke provides a wide range of updated, easy-to-implement alternative assessments that address today's accountability requirements and focus on improving learning. Designed for use across all content areas, these formative assessments are rooted in the language of state standards and emphasize differentiating instruction to meet students' individual learning needs. Revised throughout with updated research, this new edition helps K-12 teachers build Response to Intervention checklists for struggling students, develop unit plans using differentiated learning and assessment strategies, create portfolios that emphasize metacognition, design performance tasks that motivate and engage students, construct rubrics that describe indicators of quality work, create tests that focus on higher order thinking skills, offering numerous applications and examples. **How to Assess Authentic Learning** guides teachers in developing the assessment tools needed to help all students meet or exceed mandated academic standards. **Teaching Mathematics in Grades 6 - 12** Randall E. Groth, 2012-08-10 A journey into the vibrant and intriguing world of mathematics education. *Teaching Mathematics in Grades 6-12* explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students' mathematical thinking and then connecting this research to practices that enhance students' understanding of the material.

The chapters in Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies

Educational Recommender Systems and Technologies: Practices and Challenges Santos, Olga C., 2011-12-31

Recommender systems have shown to be successful in many domains where information overload exists This success has motivated research on how to deploy recommender systems in educational scenarios to facilitate access to a wide spectrum of information Tackling open issues in their deployment is gaining importance as lifelong learning becomes a necessity of the current knowledge based society Although Educational Recommender Systems ERS share the same key objectives as recommenders for e-commerce applications there are some particularities that should be considered before directly applying existing solutions from those applications Educational Recommender Systems and Technologies Practices and Challenges aims to provide a comprehensive review of state of the art practices for ERS as well as the challenges to achieve their actual deployment Discussing such topics as the state of the art of ERS methodologies to develop ERS and architectures to support the recommendation process this book covers researchers interested in recommendation strategies for educational scenarios and in evaluating the impact of recommendations in learning as well as academics and practitioners in the area of technology
