Emergent Bilinguals formerly known as English Language Learners are one of the fastest growing subgroups in the United States Their educational needs are not well met by the educational system In this book we report results of empirical multiyear studies about their reading and mathematics performance both at the elementary school and high school levels Given that state education agencies collect enormous amounts of information that are typically not well analyzed this book serves as an exemplar of secondary data analyses Educational leaders educational researchers and legislators and policymakers will find the chapters in this book useful Findings from these statewide analyses can provide readers with baselines of the performance of Emergent Bilingual students prior to the Covid 19 pandemic in reading and in mathematics Changes in instructional practices and in educational programming could be made based upon the numerous statistical results present in this book [Resources in Education](#) ,1985 *Trapped in Mediocrity* Katherine Baird,2012-08-09 Our students aren t learning we re falling behind other countries and many of our college graduates are even functionally illiterate We offer our kids a weak and poorly thought out curriculum too many teachers do not make good use of classroom time and follow lesson plans that are superficial and repetitive almost all state governments define proficiency at low levels of competency and because kids with very uneven skills populate a classroom teachers spend considerable time on review before introducing new material This dismal picture is tempered by the fact that the hard work and dedication of countless teachers and administrators means that many students get an excellent education But it doesn t temper it much As a group

even our top students are not as strong as are those in a large majority of other rich countries But it doesn't have to be this way Katherine Baird an economist starts by clearly spelling out how our educational system is trapped in mediocrity Yet she doesn't just expose where we are She identifies the steps to get out of the trap We need to 1 dramatically reform our education's governance structure 2 establish high expectations for all students 3 provide adequate support to meet those expectations and 4 introduce strong incentives for students to work hard in school so they do their part in meeting higher standards Clearly it isn't as simple as it sounds but Baird carefully examines each factor that has led to the current state in education and then spells out how a combination of policies will weaken the forces that keep our schools mediocre and instead make them ones worth copying
