intermediate goals will be presented with a brief introduction. Subsequently, the individuals within the network of will be given the opportunity to identify the intermediate goals. The original goals will be presented, the current attainability of each solution, in addition, you will be the researcher involved with assessing the current state of the solution and making it a short-term goal.

One important class of chemical reactions is double-displacement reactions. These occur when opposite (and) single-displacement reactions are occurring simultaneously. For example, in the following double-displacement reaction, the products are water and a precipitate:
