Role Reversal Mark Barnes,2013-02-09 Want to make your students more responsible for their own learning Want to create an

academic environment in which students thrive and develop a genuine thirst for knowledge. Want to improve your students' standardized test results but avoid a teach to the test mentality that throttles creativity and freedom? In this book, Mark Barnes introduces and outlines the Results Only Learning Environment, a place that embraces the final result of learning rather than the traditional methods for arriving at that result. A results only classroom is rich with individual and cooperative learning activities that help students demonstrate mastery learning on their own terms without being constrained by standards and pedagogy. By embracing results only learning, you will be able to transform your classroom into a bustling community of learners in which students collaborate daily on a number of long-term ongoing projects. Students receive constant narrative feedback. Yearlong projects target learning outcomes more meaningfully than worksheets, homework, tests, and quizzes. Freedom and independence are valued over punitive points, percentages, and letter grades. Students manage themselves and all but eliminate the need for traditional classroom management. Learn how your students can take charge of their own achievement in an enjoyable project-based workshop setting that challenges them with real-world learning scenarios and helps them attain uncommonly excellent results.

Un-Standardizing Curriculum Christine Sleeter, Judith Flores Carmona, 2017. In this Second Edition of her bestseller, Christine Sleeter and new co-author Judith Flores Carmona show how educators can learn to teach rich academically rigorous multicultural curricula within a standards-based environment. The authors have meticulously updated each chapter to address current changes in education policy and practice. New vignettes of classroom practice have been added to illustrate how today's teachers navigate the Common Core State Standards. The book's field-tested conceptual framework elaborates on the following elements of curriculum design: ideology, enduring ideas, democratized assessment, transformative intellectual knowledge, students and their communities, intellectual challenges, and curriculum resources. Un-Standardizing Curriculum shows teachers what they can do to un-standardize knowledge in their own classrooms while working toward high standards of academic achievement.

Book Features: Classroom vignettes to help teachers bridge theory with practice in the context of commonly faced pressures and expectations; Guidance for teachers who want to develop their classroom practice, including the possibilities and spaces teachers have within a standardized curriculum; Attention to multiple subject areas and levels of schooling, making the book applicable across a wide range of teacher education programs; A critique of the tensions between school reforms and progressive classroom practice. This second edition is a game-changer for educators interested in powerful curriculum engineering to support new century students.

H. Richard Milner IV, Helen Faison Endowed Chair of Urban Education, University of Pittsburgh. This text breaks new ground with a timely contribution that provides solid, potentially emancipatory grounding for a new, inclusive, research-based vision of curriculum, assessment, schools, and society.

Angela Valenzuela, author. This is a book that teachers, teacher educators, policymakers, and researchers will continue to return to for guidance and inspiration.

Dolores Delgado Bernal, University of Utah.
