Content-Based Instruction in Foreign Language Education Stephen B. Stryker, Betty Lou Leaver, 1997-09-01 This book offers concrete and practical ideas for implementing content based instruction using subject matter rather than grammar through eleven case studies of cutting edge models in a broad variety of languages academic settings and levels of proficiency The highly innovative models illustrate content based instruction programs for both commonly and less commonly taught languages Arabic Croatian French German Indonesian Italian Russian Serbian and Spanish and for proficiency levels ranging from beginners to fluent speakers They include single teacher and multi teacher contexts and such settings as typical language department classrooms specialty schools intensive language programs and university programs in foreign languages across the curriculum All of the contributors are pioneers and practitioners of content based instruction and the methods they present are based on actual classroom experiences Each describes the rationale curriculum design materials and evaluation procedures used in an actual curriculum and discusses the implications of the approach for adult language acquisition **L2 Interactional Competence and Development** Joan Kelly Hall, John Hellermann, Simona Pekarek Doehler, 2011-07-18 Drawing on data from a range of contexts including classrooms pharmacy consultations tutoring sessions and video game playing and a range of languages including English German French Danish and Icelandic the studies in this volume address challenges suggested by these questions What kinds of interactional resources do L2 users draw on to participate competently and creatively in their L2 encounters And how useful is conversation analysis in capturing the specific development of individuals interactional competencies in specific practices across time Rather than treating participants in L2 interactions as deficient speakers the book begins with the assumption that those who interact using a second language possess interactional competencies The studies set out to identify what these competencies are and how

they change across time By doing so they address some of the difficult and yet unresolved issues that arise when it comes to comparing actions or practices across different moments in time
