

The Cold War

The Cold War was a tense rivalry between the United States and the Soviet Union (also known as the USSR). The rivalry began in 1945. Though it was named the Cold War, the countries did not have physical battles. They were competing against each other to make scientific and technological breakthroughs.

The U.S. and the USSR were out of World War II as the two strongest nations. The United States was a capitalist country, while the USSR believed in communism. In a communist country, the government owns all businesses, utilities, and natural resources. The profit from them is supposed to be shared equally with all of its people.

The government of the USSR believed communism would end inequality. This is because the wealth of the country would, in theory, be given equally to everyone. Each country wanted to prove their system of government was the best. By doing this, they hoped other countries would want to follow their policies.

The U.S. and USSR both feared dangerous nuclear weapons. If used, they would have caused lasting, terrible damage. The U.S. and the USSR raced to develop weapons. If one country attacked, the other could destroy it with their store of weapons. In the end, neither side used nuclear weapons because the threat of total destruction was too high.

Another rivalry between the U.S. and the USSR was the "Space Race." Both countries wanted to be the first to explore outer space and land on the Moon. They wanted to show other countries around the world that they had the best scientists and technology. In 1961, the United States sent the first man to the Moon (Neil Armstrong), and the U.S. won the race.

Germany was very important during the Cold War. In 1945, Germany was split into two countries. East Germany was closely allied to the U.S., and West Germany was allied with the USSR. People in East Germany realized there were more opportunities and they tried to leave. In 1961, a wall was built to separate the two sections of Germany's capital city to keep people from moving from the East to the West. As the Soviet Union began to collapse, the wall was torn down and Germany was reunited in 1990. This was a significant step toward the end of the Cold War.
