Microeconomic Theory Susheng Wang, 2018-06-25 This book covers microeconomic theory at the Master's and Ph.D. levels for students in business schools and economics departments. Advanced Microeconomics Bibhas Saha, 2024-07-08 *Advanced Microeconomics* presents microeconomic problems in an intuitive way. Using lucid narratives to build on students' initial understanding of economics and economic reality, equations and diagrams are incorporated to provide accessibility to students with a basic level of calculus to reach precise quantitative answers. It covers the standard areas of microeconomics such as consumer theory, producer theory, economics of uncertainty, general equilibrium, and markets. The book also includes new developments such as behavioural economics, prospect and regret theory, public sector, firms bargaining, signalling games, adverse selection, and moral hazard. Real-life applications are given throughout the chapters, clearly showing students how the advanced theory connects to the real world. Each chapter provides a set of exercises for independent problem solving. Learning is also supported by lists of key terms, chapter summaries, and further reading suggestions. Advanced technical materials are presented in optional appendices. Digital supplements include quiz questions, solutions to exercises, and instructor materials. The flexible chapter sequencing in the book enables instructors to create their preferred syllabus. Developing students' intuitive appreciation for the theory as well as mathematical analysis, this is the ideal textbook for microeconomics courses at master's level, MSc and MRes, and advanced undergraduate level.

The Internet, Development, Human Rights and the Law in Africa Danwood Chirwa, Caroline Ncube, 2023-03-17 This book tracks and critiques the impact of the internet in Africa. It explores the legal policy implications of and legal responses to the internet in matters straddling human rights, development, trade, criminal law, intellectual property, and social justice from the perspective of several African countries and the region. Well-known and emerging African scholars consider whether access to the internet is a human right, the implications on the right to privacy, e-commerce, cybercrime, the opportunities and dangers of admitting electronic evidence, the balancing of freedom of expression with the protection of intellectual property, and how different African legal systems address this tension. This book will be an invaluable resource for a wide range of stakeholders including researchers, scholars, and postgraduate students, policymakers and legislators, lawyers and judicial officers, crime fighting agencies, national human rights institutions, civil society organisations, international and regional organisations, and human rights monitoring bodies.
