Alaily-Mattar, Davide Ponzini, Alain Thierstein, 2020-03-16 Cities across the world have been resorting to star architects to brand their projects spark urban regeneration and market the city image internationally This book shifts the attention from star architects to star architecture arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor Star architecture can in fact be better studied and understood as assembled by multiple actors and in its relationship with urban transformation In its 18 chapters the book presents a multidisciplinary collection of expert contributions in the fields of urban planning architecture media studies urban economics geography and sociology consistently brought together for the first time to deal with this topic Through a vast array of case studies and analytical techniques touching over 20 cities in Europe the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage tourism and media The book will be of interest to architects sociologists urban planners and public administrators Amateur Cinema Charles

Tepperman, 2014-12-24 From the very beginning of cinema there have been amateur filmmakers at work It wasn't until Kodak introduced 16mm film in 1923 however that amateur moviemaking became a widespread reality and by the 1950s over a million Americans had amateur movie cameras In *Amateur Cinema* Charles Tepperman explores the meaning of the amateur in film history and modern visual culture In the middle decades of the twentieth century the period that saw Hollywood's rise to dominance in the global film industry a movement of amateur filmmakers created an alternative world of small scale movie production and circulation Organized amateur moviemaking was a significant phenomenon that gave rise to dozens of clubs and thousands of participants producing experimental nonfiction or short subject narratives Rooted in an examination of surviving films this book traces the contexts of advanced amateur cinema and articulates the broad aesthetic and stylistic tendencies of amateur films *Photojournalism and Citizen Journalism* Stuart Allan, 2017-06-26 This volume

brings together leading researchers concerned with ordinary citizens' contributions to photojournalism particularly where capturing images of breaking news events is crucial to reportage It offers an evaluation of how photojournalism is evolving in digital contexts examining how today's emergent forms of co-operation collaboration and connectivity between professional and amateur news photographers promise to improve photojournalism for tomorrow This book was originally published as two special issues in *Digital Journalism* and *Journalism Practice* The Future of Journalism: Risks, Threats and Opportunities Stuart Allan, Cynthia Carter, Stephen Cushion, Lina Dencik, Inaki Garcia-Blanco, Janet Harris, Richard

Sambrook, Karin Wahl-Jorgensen, Andy Williams, 2020-04-28 This volume draws together research originally presented at the 2015 Future of Journalism conference at Cardiff University UK The conference theme Risks Threats and Opportunities

highlighted five areas of particular concern for discussion and debate The first of these areas Journalism and Social Media explores how journalism and the role of the journalist are being redefined in the digital age of social networking crowd sourcing and big data and how the influence of media like Twitter Facebook YouTube Instagram and Reddit affects the gathering reporting or consumption of news Journalists at Risk assesses the key issues surrounding journalists safety and their right to report as news organizations and their sources are increasingly targeted in war conflict or crisis situations The third area Journalism Under Surveillance asks what freedom of the press means in a post Snowden climate What are the new forms of censorship confronting journalism today and what emergent tactics will help it to speak truth to power Journalism and the Fifth Estate examines the traditional ideals of the fourth estate which risk looking outdated if not obsolete in the modern world How much can we rely on citizen media to produce alternative forms of news reporting and how can we reform mainstream media institutions to make them more open transparent and accountable to the public The final area Journalism s Values asks how journalism s ethical principles and moral standards are evolving in relation to the democratic cultures of communities locally regionally nationally or internationally What are the implications of changing priorities for the education training and employment of tomorrow s journalists Every chapter in this volume engages with a pressing issue for the future of journalism offering an original thought provoking perspective intended to help facilitate further dialogue and debate The chapters in this book were originally published in special issues of Digital Journalism Journalism Practice and Journalism Studies
