

4 AMAZING SCIENCE FACTS

Fact #1

Babies have around 100 more bones than adults.

Babies have about 300 bones at birth, with cartilage between many of them. This extra flexibility helps them pass through the birth canal and also allows for rapid growth. With age, many of the bones fuse, leaving 206 bones that make up an average adult skeleton.

Fact #2

Polar bears are nearly undetectable by infrared cameras.

Thermal cameras detect the heat lost by a subject as infrared, but polar bears are experts at conserving heat. The bears keep warm due to a thick layer of blubber under the skin. Add to this a dense fur coat and they can endure the chilliest Arctic day.

Fact #3

Stomach acid is strong enough to dissolve stainless steel.

Your stomach digests food thanks to highly corrosive hydrochloric acid with a pH of 2 to 3. This acid also attacks your stomach lining, which protects itself by secreting an alkali bicarbonate solution. The lining still needs to be replaced continually, and it entirely renews itself every four days.

Fact #4

The Earth is a giant magnet.

Earth's inner core is a sphere of solid iron, surrounded by liquid iron. Variations in temperature and density create currents in this iron, which in turn produce electrical currents. Lined up by the Earth's spin, these currents combine to create a magnetic field, used by compass needles worldwide.

Meteorology, The Legacy of Tethys F.D. Por, 2012-12-06 This book is an attempt to present a comprehensive view on the aquatic biogeography of a small but very dynamic and complex area of the globe Luckily this area called here the Levant has attracted much interest in the past and is being increasingly studied in the present The interphasing between the knowledge of the historical and formative processes and that of the recent distributional aspects is fairly good The recent years saw also a widening effort which expressed itself in several symposia and monographic books Therefore I considered it possible to treat the whole subject of the aquatic biogeography of the Levant singlehandedly rather than in the presently widespread manner of an edited book I am keenly conscious of the shortcomings of my approach of

presenting much second hand information Possibly this is being compensated by the fact that this book has a more coherent structure and eventually a clearer scientific message The effort spent in synthesizing the data from the widely different sources hopefully pays off in a presentation which is more easily comprehended by the average reader For the suspicious reader I would recommend to read first the closing chapter of this book in which the quintessence of this book and its message is presented in a summarizing manner *Newsletter United States.
