Words Onscreen Naomi S. Baron, 2015-01-09 People have been reading on computer screens for several decades now predating popularization of personal computers and widespread use of the internet But it was the rise of eReaders and tablets that caused digital reading to explode In 2007 Amazon introduced its first Kindle Three years later Apple debuted the iPad Meanwhile as mobile phone technology improved and smartphones proliferated the phone became another vital reading platform In Words Onscreen Naomi Baron an expert on language and technology explores how technology is reshaping our

understanding of what it means to read Digital reading is increasingly popular Reading onscreen has many virtues including convenience potential cost savings and the opportunity to bring free access to books and other written materials to people around the world Yet Baron argues the virtues of eReading are matched with drawbacks Users are easily distracted by other temptations on their devices multitasking is rampant and screens coax us to skim rather than read in depth What is more if the way we read is changing so is the way we write In response to changing reading habits many authors and publishers are producing shorter works and ones that don't require reflection or close reading In her tour through the new world of eReading Baron weighs the value of reading physical print versus online text including the question of what long standing benefits of reading might be lost if we go overwhelmingly digital She also probes how the internet is shifting reading from being a solitary experience to a social one and the reasons why eReading has taken off in some countries especially the United States and United Kingdom but not others like France and Japan Reaching past the hype on both sides of the discussion Baron draws upon her own cross cultural studies to offer a clear eyed and balanced analysis of the ways technology is affecting the ways we read today and what the future might bring

Going Beyond Loaning Books to Loaning Technologies Janelle Sander, Lori S. Mestre, Eric Kurt, 2015-01-20 Providing library users with actual pieces of technological equipment that they can borrow is a continuously expanding service at many libraries especially as faculty and teachers require multimodal projects For some libraries loanable technology may include calculators gaming devices headphones e readers laptops and tablets Increasingly though there is also demand for all types of cameras lighting voice recorders microphones external storage devices projectors peripherals and converters among hundreds of possibilities Based on their successful program at a large research institution the authors provide a practical manual complete with examples forms and templates that cover all aspects of establishing and maintaining a loanable technology program Going Beyond Books to Loaning Technologies A Practical Guide for Librarians provides the nuts and bolts and the behind the scenes details of developing a program and walks librarians and information technology professionals through even some of the complex decisions and processes such as needs assessment budget allocation selecting cataloging processing and storing equipment circulation billing and troubleshooting training collaborating with others to offer consultation services marketing and assessment Practical and easy to understand here is a one stop guide for anyone interested in lending technology to patrons

Just Tell Me How It Works Paul Lance, 2014-05 **Four Shades of Gray** Simon Peter Rowberry, 2022-04-05 This first book length analysis of Amazon's Kindle explores the platform's technological bibliographical and social impact on publishing Four Shades of Gray offers the first book length analysis of Amazon's Kindle and its impact on publishing Simon Peter Rowberry recounts how Amazon built the infrastructure for a new generation of digital publications then considers the consequences of having a single company control the direction of the publishing industry Exploring the platform from the perspectives of technology texts and uses he shows how the Kindle challenges traditional notions of platforms as discrete

entities He argues that Amazon's influence extends beyond disruptive technology to embed itself in all aspects of the publishing trade yet despite industry pushback he says the Kindle has had a positive influence on publishing Rowberry documents the first decade of the Kindle with case studies of Kindle Popular Highlights an account of the digitization of books published after 1922 and a discussion of how Amazon's patent filings reflect a shift in priorities Rowberry argues that while it was initially convenient for the book trade to outsource ebook development to Amazon doing so has had adverse consequences for publishers in the mid and long term limiting opportunities for developing an inclusive and forward thinking digital platform While it has forced publishers to embrace digital forms the Kindle has also empowered some previously marginalized readerships Although it is still too early to judge the long term impact of ebooks compared with that of the older technologies of clay tablets the printing press and offset printing the shockwaves of the Kindle continue to shape publishing

Abruptions: 3 Minute Stories to Awaken the Mind Jack Matthews, 2017-10-11 Matthews stories are like friends from small towns They are honest warm occasionally lyrical and as strange and idiosyncratic as the rest of us Arthur Sabatini During the last decade of his life author Jack Matthews wrote a series of 1 2 page prose pieces which he dubbed Abruptions or very short stories that end abruptly Matthews had already published over 20 books of fiction with an astonishing variety of characters and plots This last volume hints at a lot of characters and plots without trying to resolve them Each abruption which rarely takes more than 5 minutes to read shed light on something unexpected whether it be a character's view on life or the reader's notions of how the world ought to work Many episodes read like contemporary fables or sketches of quirky people from small midwest towns Two older women have a long running feud about what flowers should go on the fence between their houses An actor makes a living out of playing the bad Nazi in movies An owner of a movie studio in the 1930s throws out any audience member who misbehaves during a movie An office worker is distracted by a pretty woman washing the outside windows Other stories sound like wild fairy tales What if one superintelligent Siamese twin were conjoined with an idiot brother What if a witch's curse caused every third word uttered by a person to go unsaid What if a woman has terrifying dreams about a missing watch Some stories simply ponder the imponderable Why do certain memories persist or reappear Why do elderly people become set in their ways Why do people become blind to certain things Matthews explains in the book's preface that abruptions can reach down to dimensions of wonder and speculation that are commonly thought to be the proper domain of poetry These stories are a fitting coda for Matthew's career as a storyteller As deep and dark as these abruptions can become they are told with simple language flashes of humor and a sage's sense of wonder and irony

Ambient Literature Tom Abba, Jonathan Dovey, Kate Pullinger, 2020-11-30 This book considers how a combination of place based writing and location responsive technologies produce new kinds of literary experiences Building on the work done in the Ambient Literature Project 2016-2018 this book argues that these encounters constitute new literary forms in which the authored text lies at the heart of an embodied and mediated experience The visual sonic social and historic resources of place

become the elements of a live and emergent *mise en scène*. Specific techniques of narration including hallucination, memory, history, place-based writing and drama as well as reworking of traditional storytelling forms combine with the work of app and user experience design, interaction software, authoring and GIS (geographical information systems) to produce ambient experiences where the user reads a textual and sonic literary space. These experiences are temporary, ambiguous and unpredictable in their meaning but unlike the theatre, the gallery or the cinema they take place in the everyday shared world. The book explores the potentiality of a new literary form produced by the exchange between location-aware cultural objects, writers and readers. This book and the work it explores lays the ground for a new poetics of situated writing and reading practices.
