Let Us Fight as Free Men Christine Knauer, 2014-04-22 Today the military is one the most racially diverse institutions in the United States But for many decades African American soldiers battled racial discrimination and segregation within its ranks In the years after World War II the integration of the armed forces was a touchstone in the homefront struggle for equality though its importance is often overlooked in contemporary histories of the civil rights movement Drawing on a wide array of sources from press reports and newspapers to organizational and presidential archives historian Christine Knauer recounts the conflicts surrounding black military service and the fight for integration Let Us Fight as Free Men shows that even after their service to the nation in World War II it took the persistent efforts of black soldiers as well as civilian activists and government policy changes to integrate the military In response to unjust treatment during and immediately after the war African Americans pushed for integration on the strength of their service despite the oppressive limitations they faced on the front and at home Pressured by civil rights activists such as A Philip Randolph President Harry S Truman passed an executive order that called for equal treatment in the military Even so integration took place haltingly and was realized only after the political and strategic realities of the Korean War forced the Army to allow black soldiers to fight alongside their white comrades While the war

pushed the civil rights struggle beyond national boundaries it also revealed the persistence of racial discrimination and exposed the limits of interracial solidarity Let Us Fight as Free Men reveals the heated debates about the meaning of military service manhood and civil rights strategies within the African American community and the United States as a whole

Transfer Spending, Taxes, and the American Welfare State Wallace C. Peterson, 2012-12-06 In 1989 the federal government spent 1197 billion a mind boggling sum that is almost impossible to visualize Since there were 248.8 million people living in the United States in that year the government spent an average of 4811 for every man woman and child in the nation For a hypothetical family of four federal spending in 1989 amounted to an average of 19,244 To put this sum in perspective the money income of an American family averaged 35,270 in the same year To finance spending 1197 billion the government collected taxes from American citizens and residents in an amount of 1047 billion Because of a shortfall between what it spent and what it took in taxes the government had to borrow 150 billion partly from individuals but mostly from banks insurance companies and foreigners How where and on whom did the federal government spend all this money Since federal spending in 1989 totaled 23 cents in comparison to every dollar spent for the buying of goods and services finding an answer to this question is not a trivial matter Spending by Washington reaches into every nook and cranny of the economy touching the lives and fortunes of almost everyone in the nation Thus answers to these questions are of more than academic interest
