Bibliography Arthur James Wells, 2009 **Vertigo** Shabih H. Zaidi, Arun Sinha, 2013-06-24 This monograph on vertigo is based on the personal hands on practical and clinical experience of managing vertigo in a large university affiliated hospital It covers all aspects of the subject offering the latest information on epidemiology aetiopathogenesis diagnostics the battery of vestibular and allied tests treatment rehabilitative management and ethical considerations The neglected but substantial problem of paediatric vertigo is addressed as are the many pathologies in the elderly population that can lead to disequilibrium and repeated falls This book will prove of value to a range of practitioners including family physicians otologists audiologists vestibular scientists neurologists paediatricians geriatricians physiotherapists rehabilitation therapists and general doctors as well as medical and nursing students Handbook of Cardiac Anatomy, Physiology, and Devices Paul A. Iaizzo, 2009-07-01 A revolution began in my professional career and education in 1997 In that year I visited the University of Minnesota to discuss collaborative opportunities in cardiac anatomy physiology and medical device testing The meeting was with a faculty member of the Department of Anesthesiology Professor Paul Iaizzo I didn't know what to expect but as always I remained open minded and optimistic Little did I know that my life would never be the same During the mid to late 1990s Paul Iaizzo and his team were performing anesthesia research on isolated guinea pig hearts We found the work appealing but it was unclear how this research might apply to our interest in tools to aid in the design of implantable devices for the cardiovascular system As discussions progressed we noted that we would be far more interested in reanimation of large mammalian hearts in particular human hearts Paul was confident this could be accomplished on large hearts but thought that it would be unlikely that we would ever have access to human hearts for this application We shook hands and the collaboration was born in 1997 In the same year Paul and the research team at the University of Minnesota including Bill Gallagher and Charles Soule reanimated several swine hearts Unlike the previous work on guinea pig hearts which were reanimated in Langendorff mode the intention of this research was to produce a fully functional working heart model for
