Ancestral Appetites Food In Prehistory:

Ancestral Appetites Kristen J. Gremillion, 2011-03-14 This book explores the relationship between prehistoric people and their food what they ate why they ate it and how researchers have pieced together the story of past foodways from material traces Contemporary human food traditions encompass a seemingly infinite variety but all are essentially strategies for meeting basic nutritional needs developed over millions of years Humans are designed by evolution to adjust our feeding behaviour and food technology to meet the demands of a wide range of environments through a combination of social and experiential learning In this book Kristen J Gremillion demonstrates how these evolutionary processes have shaped the diversification of human diet over several million years of prehistory She draws on evidence extracted from the material remains that provide the only direct evidence of how people procured prepared presented and consumed food in prehistoric times

Tuckaleechee Cove Boyce N. Driskell,Robert J. Norrell,2024-01-12 Nestled amid the western slopes of the Great Smoky Mountains in East Tennessee bisected by the Little River and including the community of Townsend Tuckaleechee Cove is known today as the peaceful side of the Smokies Celebrated for its natural beauty the area is also the site of human habitation dating back at least 13 000 years Tuckaleechee Cove s rich past emerged from years of archaeological and historical research that began in 1999 when a state highway project uncovered a wealth of Native American and Euro American remains including burial mounds fragments of tools weapons cooking vessels and other evidence of past activity This bountifully illustrated book combines details from that study with fascinating bits of history to tell the story of the cove and its disparate peoples The earliest Native Americans to visit the area were hunters and foragers who moved in small bands through the cove setting up temporary camps Over the millennia

foraging gave way to more settled farming practices with the establishment of permanent settlements about 2 000 years ago By the 1600s the area s residents were Cherokees who would soon encounter European explorers and traders Displacing the Cherokees Euro Americans formed a number of small communities in the cove with colorful names like Frog Town and Needmore They farmed the land built churches schools and small businesses and fought in the Civil War In 1900 a northern investor named W B Townsend recognized the area s potential as a source of timber and two years later the town bearing his name was literally abuzz with sawmill activity By the Great Depression however the mills had closed bringing hardship to cove residents A measure of relief came in 1934 when the Great Smoky Mountains National Park was established nearby opening a new still unfolding chapter in the area s history Boyce N Driskell is the past director of the Archaeological Research Laboratory and adjunct research professor in the Department of Anthropology at the University of Tennessee Knoxville Robert J Norrell is a professor and the Bernadotte Schmidt Chair of Excellence in the Department of History at the University of Tennessee Knoxville

[Ancient Ocean Crossings](#) Stephen C. Jett,2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth s two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete

evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development Apes and Human Evolution Russell H. Tuttle,2014-02-17 Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes **Ancestral Diets and Nutrition** Christopher Cumo,2020-11-19 Ancestral Diets and Nutrition supplies dietary advice based on the study of prehuman and human populations worldwide over the last two million years This thorough accessible book uses prehistory and history as a laboratory for testing the health effects of various foods It examines all food groups by drawing evidence from skeletons and their teeth middens and coprolites along with written records where they exist to determine peoples health and diet Fully illustrated and grounded in extensive research this book enhances knowledge about diet nutrition and health It appeals to practitioners in medicine nutrition anthropology biology chemistry economics and history and those seeking a clear explanation of what humans have eaten across the ages and what we should eat now Features Sixteen chapters examine fat sweeteners grains roots and tubers fruits vegetables and animal and plant sources of protein Integrates information about diet nutrition and health from ancient medieval modern and current sources drawing from the natural sciences social sciences and humanities Provides comprehensive coverage based on the study of several hundred sources and the provision of over 2 000 footnotes Presents practical information to help shape readers next meal through recommendations of what to eat and what to avoid

Ceramics, Cuisine and Culture Michela Spataro,Alexandra Villing,2015-10-31 The 23 papers presented here are the product of the interdisciplinary exchange of ideas and approaches to the study of kitchen pottery between archaeologists material scientists historians and ethnoarchaeologists They aim to set a vital but long neglected category of evidence in its wider social political and economic contexts Structured around main themes concerning technical aspects of pottery production cooking as socioeconomic practice and changing tastes culinary identities and cross cultural encounters a range of social economic and technological models are discussed on the basis of insights gained from the study of kitchen pottery production use and evolution Much discussion and work in the last decade has focussed on technical and social aspects of coarse ware and in particular kitchen ware The chapters in this volume contribute to this debate moving kitchen pottery beyond the Binfordian technomic category and embracing a wider view linking processualism ceramic ecology behavioral schools and ethnoarchaeology to research on historical developments and cultural transformations covering a broad

geographical area of the Mediterranean region and spanning a long chronological sequence

Culinary Turn Nicolaj van der Meulen, Jörg Wiesel, Raphaela Reinmann, 2017-04-15 Kitchen cooking nutrition and eating have become omnipresent cultural topics They stand at the center of design gastronomy nutrition science and agriculture Artists have appropriated cooking as an aesthetic practice in turn cooks are adapting the staging practices that go with an artistic self image This development is accompanied by crisis of eating behaviour and a philosophy of cooking as a speculative cultural technique This volume investigates the dimensions of a new culinary turn combining for the very first time contributions from the theory and practice of cooking

Abundance Monica L. Smith, 2017-06-15 Using case studies from around the globe including Mesoamerica North and South America Africa China and the Greco Roman world and across multiple time periods the authors in this volume make the case that abundance provides an essential explanatory perspective on ancient peoples choices and activities Economists frequently focus on scarcity as a driving principle in the development of social and economic hierarchies yet focusing on plenitude enables the understanding of a range of cohesive behaviors that were equally important for the development of social complexity Our earliest human ancestors were highly mobile hunter gatherers who sought out places that provided ample food water and raw materials Over time humans accumulated and displayed an increasing quantity and variety of goods In households shrines tombs caches and dumps archaeologists have discovered large masses of materials that were deliberately gathered curated distributed and discarded by ancient peoples The volume s authors draw upon new economic theories to consider the social ideological and political implications of human engagement with abundant quantities of resources and physical objects and consider how individual and household engagements with material culture were conditioned by the quest for abundance Abundance shows that the human propensity for mass consumption is not just the result of modern production capacities but fulfills a longstanding focus on plenitude as both the assurance of well being and a buffer against uncertainty This book will be of great interest to scholars and students in economics anthropology and cultural studies Contributors Traci Ardren Amy Bogaard Elizabeth Klarich Abigail Levine Christopher R Moore Tito E Naranjo Stacey Pierson James M Potter Francois G Richard Christopher W Schmidt Carol Schultze Payson Sheets Monica L Smith Katheryn C Twiss Mark D Varien Justin St P Walsh Mar a Nieves Zede o

The Prehistory of Food Chris Gosden, Jon G. Hather, 2004-01-14 The Prehistory of Food sets subsistence in its social context by focusing on food as a cultural artefact It brings together contributors with a scientific and biological expertise as well as those interested in the patterns of consumption and social change and includes a wide range of case studies

The Archaeology of Caribbean and Circum-Caribbean Farmers (6000 BC - AD 1500) Basil Reid, 2018-05-16 Comprising 17 chapters and with a wide geographic reach stretching from the Florida Keys in the north to the Guianas in the south this volume places a well needed academic spotlight on what is generally considered an integral topic in Caribbean and circum Caribbean archaeology The book explores a variety of issues including the introduction and dispersal of early cultivars plant

manipulation animal domestication dietary profiles and landscape modifications Tried and true and novel analytical techniques are used to tease out aspects of the Caribbean and circum Caribbean database that inform the complex and often subtle processes of domestication under varying socio environmental conditions Contributors discuss their findings within multiple constructs such as neolithisation social interaction trade mobility social complexity migration colonisation and historical ecology Multiple data sources are used which include but are not restricted to rock art cooking pits and pots stable isotopes dental calculus and pathologies starch grains and proxies for past environmental conditions Given its multi disciplinary approaches this volume should be of immense value to both researchers and students of Caribbean archaeology biogeography ethnobotany zooarchaeology historical ecology agriculture environmental studies history and other related fields

Minority Report William T. Lynch,2020-10-16 In Philip K Dick s The Minority Report precogs who are imaginary individuals capable of seeing the future are relied upon to stop crime with a consensus report synthesized from two of three precogs When the protagonist is indicted for a future murder he suspects a conspiracy and seeks out the minority report detailing the suppressed testimony of the third precog Science works a lot like this science fiction story Contrary to the view that scientists in a field all share the same paradigm as Thomas Kuhn famously argued scientists support different and competing research programs Statements of scientific consensus need to be actively synthesized from the work of different scientists Not all scientific work will be equally credited by science as a whole While this system works well enough for most purposes it is possible for minority views to fail to get the hearing that they deserve This book analyzes the support that should be given to minority views reconsidering classic debates in science and technology studies and examining numerous case studies

A História Secreta dos Alimentos Matt Siegel,2023-02-01 A HISTÓRIA SECRETA DOS ALIMENTOS de leitura obrigatória para os verdadeiros amantes de comida revelando factos improáveis e desconhecidos sobre tudo aquilo que consumimos De forma divertida e controversa Matt Siegel desvenda toda uma nova perspetiva sobre os alimentos desmontando mitos e abordando histórias e tradições mal contadas Ser o azeite realmente italiano ou estaremos a mergulhar o peixe em óleo de candeeiro Porque que de forma algo masoquista nos sentimos atraídos por

alimentos que nos podem fazer mal como as malaguetas Apesar de ser um clássico americano ser a tarte de ma originalmente inglesa Como espécie animal estamos geneticamente programados para ser obcecados por comida explica Matt Siegel enquanto revela o lado oculto de tudo aquilo que metemos nas bocas Siegel explora várias temáticas os mitos e realidades sobre uma fruta afrodisíaca como uma das mais raras e exóticas especiarias do mundo baunilha passou a ser sinónimo de tendências sexuais inesperadas e qual o papel da comida nos contos populares E ainda consegue argumentar como que o gelado ajudou a derrotar os Nazis A História Secreta dos Alimentos uma rica e prazerosa exploração das subculturas históricas culturais científicas sexuais e sim culinárias deste tão essencial reino que são os alimentos Pode comparar-se a destreza culinária de Siegel de Anthony Bourdain pelo que ao invés da faca de chef surge equipado com um conhecimento gastronómico que foi beber a manuscritos medievais pergaminhos chineses antigos e revistas obscuras de culinária Divertido e fascinante um livro essencial para todos os foodies
