Employability is attracting growing attention from researchers and practitioners alike given the contemporary employment landscape one characterized by technological changes ageing populations and competitive organizational environments This interest is in part motivated by the realisation that employability implies a win win situation as employable workers have stocks of knowledge skills and abilities and they are flexible and open to change However the role of the employer and specifically their investments in Human Resource Management policies and practices are largely absent in the current employability discourse Employability is usually regarded as an individual asset in which employees carry almost all responsibility for employability maintenance and development Remarkably little has been done to remedy the neglect of the employer perspective and advance knowledge and practice This book brings together contributions from an international

team of renowned management scholars who explore how Human Resource Management investments affect workers employability Drawing on empirical evidence from all over the world this book informs researchers practitioners and students in the fields of business and management especially those with a particular interest in HRM and organizational behaviour The chapters in this book were originally published as a special issue of The International Journal of Human Resource Management

Dangerous Tides Ulrike Gehring, Simon Karstens, Christian Rollinger, 2025-08-18 The dangers and risks lurking in the deep waters of the world be they profane and natural storms currents shoals cliffs pirates or divine and supernatural the wrath of one or more gods magic sea monsters are as individual and diverse as the stories of their consequences and as numerous as the intentions behind these retellings and reconfigurations In their telling specific dangers become accepted risks that those who undertake the venture of a sea voyage choose or not to expose themselves to Maritime actors make their assessments of the balance between risk and benefit according to historical and contemporary cultural criteria which are contingent on the discursive horizon of their time as reflected in iconographic and textual sources Building on sociological and historical understandings of risk as conscious exposure to specific dangers the case studies in this volume engage with conceptions and discourses of maritime risks in written and visual media from antiquity to the early modern world with contributions ranging from early Greek epic to British Atlantic merchants in the 1700s This broad perspective enables a multifaceted study of representations of maritime dangers in words images and numbers and to discuss contemporary discourses on causes consequences and methods for avoidance of maritime risk
