and his collaborators have devised elegant experiments to unmask how they do it Through a lively and lucid narrative Desert Navigator offers a firsthand look at the extraordinary navigational skills of these charismatic desert dwellers and the experiments that revealed how they strategize and solve complex problems Wehner and his team discovered that these insect navigators use visual cues in the sky that humans are unable to see the Earth's magnetic field wind direction a step counter and panoramic snapshots of landmarks among other resources The ants combine all of this information to steer an optimal course At any given time during their long journey they know exactly where to go It is no wonder these nimble and versatile creatures have become models in the study of animal navigation Desert Navigator brings to light the marvelous capacity and complexity found in these remarkable insects and shows us how mini brains can solve mega tasks *The Best Books* William Swan Sonnenschein, 1891 **Catalogue of Government Publications** Great Britain.
