Media Technology in Education Martin A.M. Gansinger, Ayman Kole, 2023-12-02 This volume offers rare perspectives examining the influence of media technology on learning patterns and behaviours among today's youth in Uganda The various contributions from international scholars discuss general introductory aspects dealing with the fabric and structure of Uganda's society and educational institutions and how they are affected by new media technology and innovations Next to outlining the increasing challenge to unify traditional patterns and the adaptation of media based practices that modern societies are built upon the book offers detailed insight into practical solutions that serve as inspiring examples of how to successfully bridge the gap between the two While titles on youth and media tend to focus on a Western perspective the proposed volume enables a closer look at things in a country and a region often neglected by researchers The work offers a specific examination of media and education provided by national and international scholars *Transforming Research Excellence* McLean, Robert, Tijssen, Robert, Wallace, Matthew L., Kraemer-Mbula, Erika, 2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is

importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North *Sharing Higher Education's Promise beyond the Few in Sub-Saharan Africa* Peter Darvas, Shang Gao, Yijun Shen, Bilal Bawany, 2017-11-15

Despite a spectacular expansion of the higher education sector in Sub Saharan Africa the supply of tertiary education has generally failed to keep pace with demand and the region continues to lag all other regions in terms of access to tertiary education This is in part a consequence of deeply entrenched patterns of inequitable access to higher education and the perpetuation of what researchers refer to as elite systems To date access to tertiary education in Sub Saharan Africa has unduly benefitted students drawn from the region s wealthiest households and overall enrollment remains disproportionately male and metropolitan These factors stifle the catalytic potential of higher education corroding its potential for driving economic growth and sustaining poverty reduction Instead patterns of access to tertiary education have generally reinforced and reproduced social inequality instead of eroding its pernicious social and economic effects This report aims to inform an improved understanding of equity in tertiary enrollment in Sub Saharan African countries and to examine the extent to which inequity functions as a bottleneck inhibiting the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness In our survey of the evidence we also aim to identify which policies most effectively address the challenge of promoting equity of access in SSA tertiary education systems In order to achieve these objectives the report collects generates and analyzes empirical evidence on patterns of equity examines the underlying causes of inequity and evaluates government policies for addressing inequity *African Studies: Breakthroughs in Research and Practice* Management Association, Information Resources, 2020-04-03
