The Status of Student Involvement in University Governance in Kenya Mulinge, Munyae M., Arasa, Josephine N., 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the

student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya

Race and College Admissions Jamillah

Moore,2024-07-22 In the United States elite colleges and universities have historically catered primarily to wealthy predominantly white Americans creating barriers to entry for students of color Legal statutes have entrenched discriminatory practices within the admissions process perpetuating the underrepresentation of students of color at top tier institutions Given this reality the imperative for institutions to promote diversity through affirmative action remains crucial However recent legal challenges against affirmative action threaten to reinforce the status quo potentially perpetuating the dominance of predominantly white institutions in higher education This book takes an historical look at the pivotal role affirmative action has played in higher education It examines the admissions process through the eyes of a beneficiary of affirmative action and is the first text to share insights on the role eligibility plays in allowing universities to consider race in admitting applicants Detailed are the different types of affirmative action and how some colleges and universities use the policy as a tool to consider race and ethnicity as part of a holistic evaluation of applicants This work makes the case that race conscious admissions practices remain necessary in the fight for racial equity in higher education **Education Policy Strategies Today and Tomorrow Around the "Mare Balticum"** Max Hogeferster,Baltic Sea Academy,2011 Knowledge and education are key factors for a successful future in modern globalised times This applies especially to the resource poor Baltic Sea region and its small and medium sized enterprises Without excellent qualified staff and executives they cannot compete on a global scale The authors of this book scientists entrepreneurs and journalists address the main problems of our education systems ranging from schools to vocational training and universities But not only do they analyse these diverse systems but also develop strategies for successfully meeting the challenges ahead of us **Studies in Indian Public Finance** M. of collective knowledge with learning cognition socialization transmission of culture languages and corporeality They also analyse local educational practices in scenarios of intense political conflict where issues such as poverty migration gender ethnicity memory territory and academic training intersect The book brings to light the range of contributions that emerged since the last decade of the twentieth century and stimulates the understanding of the breadth and extension of Ethnography and Education It was originally published as a special issue of the journal *Ethnography and Education*
