Crash Course presents detailed question level strategies for answering both the multiple choice and essay questions. By following this advice you can boost your score in every section of the test. Take REA's Online Practice Exam. After studying the material in the Crash Course go to the online REA Study Center and test what you've learned. Our practice exam features timed testing, detailed explanations of answers and automatic scoring analysis. The exam is balanced to include every topic and type of question found on the actual AP exam so you know you're studying the smart way. Whether you're cramming for the test at the last minute looking for extra review or want to study on your own in preparation for the exams, this is the study guide every AP Chemistry student must have. When it's crucial crunch time and your Advanced Placement exam is just around the corner you need REA's Crash Course for AP Chemistry.

About the Author: Adrian Dingle is a chemistry educator and author with 24 years of experience teaching in the United States and the United Kingdom. He is the creator of the award-winning chemistry website www.adriandingleschemistrypages.com. The focus of Mr Dingle's teaching career has been on preparing students for standardized tests: AP and SAT tests in the United States, GCSE's and A levels in the United Kingdom and International Baccalaureate in both countries. An Englishman, he lives in Atlanta, Georgia where he teaches at The Westminster Schools. He holds a B.Sc. Hons Chemistry and a Postgraduate Certificate in Education, both from the University of Exeter in England. In addition to writing this Crash Course, Mr Dingle has written *The Periodic Table Elements With Style*, *How To Make A Universe With 92 Ingredients* and *SAT Chemistry Crash Course*. He is the 2011 winner of the School Library Association of the UK's Information Book Award and in 2012 was honored with the prestigious literary prize *Wissenschaftsbuch des Jahre* sponsored by the Austrian Ministry of Science and Research.

Organic Chemistry Adrian Dingle, 2011-02. The book captures the essence of the important and typical organic chemistry content studied at the 16-19 age range in courses such as A/AS Level, UK International Baccalaureate, International and Advanced Placement USA, but also goes beyond the exam to provide a deeper insight into the real world application of the chemistry normally studied at this level. The book covers the structure, nomenclature, chemistry and applications of some of the typical functional groups in chemistry studied by the target audience. Factual nuts and bolts make up the bulk of the early part of each section, with case studies helping to illustrate the real world application of the chemistry. Questions appearing within each section are pitched at the level of the AP, A/AS and IB examinations.
