Spacecraft Attitude Determination and Control J.R. Wertz, 2012-12-06 Roger D Werking Head Attitude Determination and Control Section National Aeronautics and Space Administration Goddard Space Flight Center Extensiye work has been done for many years in the areas of attitude

determination attitude prediction and attitude control During this time it has been difficult to obtain reference material that provided a comprehensive overview of attitude support activities This lack of reference material has made it difficult for those not intimately involved in attitude functions to become acquainted with the ideas and activities which are essential to understanding the various aspects of spacecraft attitude support As a result I felt the need for a document which could be used by a variety of persons to obtain an understanding of the work which has been done in support of spacecraft attitude objectives It is believed that this book prepared by the Computer Sciences Corporation under the able direction of Dr James Wertz provides this type of reference This book can serve as a reference for individuals involved in mission planning attitude determination and attitude dynamics an introductory textbook for students and professionals starting in this field an information source for experimenters or others involved in spacecraft related work who need information on spacecraft orientation and how it is determined but who have neither the time nor the resources to pursue the varied literature on this subject and a tool for encouraging those who could expand this discipline to do so because much remains to be done to satisfy future needs *Books in Print* ,1994 **Subject Guide to Books in Print** ,1997 **Computational Modelling**

and Simulation of Aircraft and the Environment, Volume 1 Dominic J. Diston,2009-04-20 This first volume of Computational Modelling of Aircraft and the Environment provides a comprehensive guide to the derivation of computational models from basic physical mathematical principles giving the reader sufficient information to be able to represent the basic architecture of the synthetic environment Highly relevant to practitioners it takes into account the multi disciplinary nature of the aerospace environment and the integrated nature of the models needed to represent it Coupled with the forthcoming Volume 2 Aircraft Models and Flight Dynamics it represents a complete reference to the modelling and simulation of aircraft and the environment All major principles with this book are demonstrated using MATLAB and the detailed mathematics is developed progressively and fully within the context of each individual topic area thereby rendering the comprehensive body of material digestible as an introductory level text The author has drawn from his experience as a modelling and simulation specialist with BAE SYSTEMS along with his more recent academic career to create a resource that will appeal to and benefit senior graduate students and industry practitioners alike **The Publishers' Trade List Annual** ,1979
