 Ordinary Differential Equations and Related Problems of Physics, Engineering, and Life Sciences Nathaniel S. Barlow, Steven
 J. Weinstein, 2025-10-09 This book is the first to offer a systematic methodology for solving nonlinear ordinary differential
 equations via power series specifically those arising in mathematical physics It provides tools to eliminate the tedious
 manipulation of infinite series enabling recursive computation of all terms The authors also present a structured approach to
 overcoming convergence issues inherent to such methods demonstrating that power series solutions can be both accessible
 and practical The authors teaching philosophy that mathematics is best learned by doing is reflected throughout with the text
 largely composed of idea driven examples and physically motivated problems from their own research Proofs are included
 only when necessary for readers to construct custom theorems or definitions relevant to real world applications Ultimately
 the book shows that power series methods can effectively complement numerical techniques offering applied mathematicians
 a powerful and versatile toolset This book is intended for researchers engaged in applied mathematics and is structured so it
 can be used in a one semester advanced undergraduate or graduate course Necessary course prerequisites are a knowledge
