Rationale	This lesson is preparing you for various recipes by providing you with knowledge about direct heat sources, moist heat, and cooking using specific temperatures. Not all recipes use simple terms like "bake" and "boil", so in order to expand our foundation of known culinary terms, we must research and experience more complex cook methods.
Duration of Lesson	Five 90-minute classes including 2 lab days
Moist Heat	Dry Heat: Heat produced without the addition of water-based moisture (bake, grill, roast, broil, sauté, etc.) therefore all cook methods involving oil are considered "dry" cook methods. Moist Heat: Heat produced with the addition of water-based moisture Direct Heat: Heat source directly positioned to food without a barrier such as a pan or lid Immersion: to completely submerge Fat: butter, oil, or other oily substance Sauter: to "jump" in French Sauté-pan: a round, bowl-shaped pan with a flat bottom. Covered-pan: a pan topped with a lid Mise en place: "putting-in place" in French; in lab settings to gather all equipment, preheat ovens, and measure ingredients prior to beginning a recipe.
