Amazing Arts 33 Jean Leon Gerome Volume 33:

The Spectacular Art of Jean-Léon Gérôme (1824-1904) Jean Léon Gérôme, Laurence Des Cars, Dominique de Font-Réaulx, Édouard Papet, 2010 Germe was one of the most famous artists of his day yet throughout his career he was the object of polemical debate and harsh criticism Long stigmatized as the embodiment of sterile academicism he is now considered to be one of the greatest painters of the nineteenth century Germe's interest in Antiquity his theatrical approach to history painting and his complex relationships with the Orient and with the new medium of photography all contributed to his highly inventive imagery Acquired by American collectors at an early date Germe's oeuvre fired the new world's historical imagination and even inspired its favorite medium the movies This catalogue traces Germe's unique career and features his major works from history paintings to polychrome sculptures thereby casting the nineteenth century in a new light Page 4 of cover *Jean-Léon Gérôme (1824-1904)* Jean Léon Gérôme, 1972 **The Register of the Museum of Art** University of Kansas. Museum of Art, 1963 **George Washington and Political Fatherhood** Heinz Tschachler, 2020-02-20 More than two hundred years after his death George Washington is still often considered the metaphorical father of the United States He was first known as the Father of His Country during his lifetime when the American people bestowed the title upon him as a symbolic act of resistance and rebirth Since then presidents have stood as paternal figureheads for America often serving as moral beacons This book tracks political fatherhood throughout world history from the idea of the pater patriae in Roman antiquity to Martin Luther's Bible translations and beyond Often using George Washington as a paradigm the author explores presidential iconography in the U S propaganda and the role of paternal rhetoric in shaping American sociopolitical history including the results of the 2016 presidential election **Art in Theory** Paul Wood, Leon Wainwright, Charles Harrison, 2020-12-11 A ground breaking new anthology in the Art in Theory series offering an examination of the changing relationships between the West and the wider world in the field of art and material culture Art in Theory The West in the World is a ground breaking anthology that comprehensively examines the relationship of Western art to the art and material culture of the wider world Editors Paul Wood and Leon Wainwright have included 370 texts some of which appear in English for the first time The anthologized texts are presented in eight chronological parts which are then subdivided into key themes appropriate to each historical era The majority of the texts are representations of changing ideas about the cultures of the world by European artists and intellectuals but increasingly as the modern period develops and especially as colonialism is challenged a variety of dissenting voices begin to claim their space and a counter narrative to western hegemony develops Over half the book is devoted to 20th and 21st century materials though the book's unique selling point is the way it relates the modern globalization of art to much longer cultural histories As well as the anthologized material Art in Theory The West in the World contains A general introduction discussing the scope of the collection Introductory essays to each of the eight parts outlining the main themes in their historical contexts Individual introductions to each text explaining how they relate to

the wider theoretical and political currents of their time Intended for a wide audience the book is essential reading for students on courses in art and art history It will also be useful to specialists in the field of art history and readers with a general interest in the culture and politics of the modern world **Narrative painting in nineteenth-century Europe**

Nina Lübbren,2023-05-23 This ground breaking book presents a critical study of pictorial narrative in nineteenth century European painting Covering works from France Germany Britain Italy and elsewhere it traces the ways in which immensely popular artists like Jean L on G r me Karl von Piloty and William Quiller Orchardson used unique visual strategies to tell thrilling and engaging stories Regardless of genre content or national context these paintings share a fundamental modern narrative mode Unlike traditional art they do not rely on textual sources nor do they tell stories through the human body alone Instead they experiment with objects spaces cause and effect relations and open ended ambiguity prompting viewers and reviewers to read for clues in order to weave their own elaborate tales *I'm Not Myself at All* Kristina

Huneault,2018-07-16 Notions of identity have long structured women s art Dynamics of race class and gender have shaped the production of artworks and oriented their subsequent reassessments Arguably this is especially true of art by women and of the socially engaged criticism that addresses it If identity has been a problem in women s art however is more identity the solution In this study of nineteenth and early twentieth century art in Canada Kristina Huneault offers a meditation on the strictures of identity and an exploration of forces that unsettle and realign the self Looking closely at individual artists and works Huneault combines formal analysis with archival research and philosophical inquiry building nuanced readings of objects that range from the canonical to the largely unknown Whether in miniature portraits or genre paintings botanical drawings or baskets women artists reckoned with constraints that limited understandings of themselves and others They also forged creative alternatives At times identity features in women s artistic work as a failed project at other times it marks a boundary beyond which they were able to expand explore and exult Bringing together settler and indigenous forms of cultural expression and foregrounding the importance of colonialism within the development of art in Canada *I m Not Myself at All* observes and reactivates historical art by women and prompts readers to consider what a less restrictive conceptualization of selfhood might bring to current patterns of cultural analysis Angels of Art Bailey Van

Hook,2004-06-11 Images of women were ubiquitous in America at the turn of the last century In painting and sculpture they took on a bewildering variety of identities from Venus Ariadne and Diana to Law Justice the Arts and Commerce Bailey Van Hook argues here that the artists concepts of art coincided with the construction of gender in American culture She finds that certain characteristics such as ideal beautiful decorative and pure both describe this art and define the perceived role of women in American society at the time Most late nineteenth century American artists had trained in Paris where they learned to use female imagery as a pictorial language of provocative sensuality Van Hook first places the American artists in an international context by discussing the works of their French teachers including Jean L on G r me and Alexandre Cabanel

She goes on to explore why they soon had to distance themselves from that context primarily because their art was perceived as either openly sensual or too obliquely foreign by American audiences Van Hook delineates the modes of representation the American painters chose which ranged from the more traditional allegorical or mythological subjects to a decorative figure painting indebted to Whistler Changing American culture ultimately rejected these idealized female images as too genteel and eventually too academic and European Angels of Art is the first study to discuss the predominance of images of women across stylistic boundaries and within the wider context of European art It relies heavily on contemporary sources both to document critical responses and to find intersecting patterns in attitudes toward women and art **Origins of**

After Orientalism , 2014-11-27 The debate on Orientalism began some fifty years ago in the wake of decolonization While initially considered a turning point Edward Said s Orientalism 1978 was in fact part of a larger academic endeavor the political critique of colonial science that had already significantly impacted the humanities and social sciences In a recent attempt to broaden the debate the papers collected in this volume offered at various seminars and an international symposium held in Paris in 2010 2011 critically examine whether Orientalism as knowledge and as creative expression was in fact fundamentally subservient to Western domination By raising new issues the papers shift the focus from the center to the peripheries thus analyzing the impact on local societies of a major intellectual and institutional movement that necessarily changed not only their world but the ways in which they represented their world World history which assumes a plurality of perspectives leads us to observe that the Saidian critique applies to powers other than Western European ones three case studies are considered here the Ottoman Russian and Soviet and Chinese empires Other essays in this volume proceed to analyze how post independence states have made use of the tremendous accumulation of knowledge and representations inherited from previous colonial regimes for the sake of national identity as well as how scholars change and adapt what was once a hegemonic discourse for their own purposes What emerges is a new landscape in which to situate research on non Western cultures and societies and a road map leading readers beyond the restrictive dichotomy of a confrontation between
