Book Wars John B. Thompson, 2021-03-04 This book tells the story of the turbulent decades when the book publishing industry collided with the great technological revolution of our time From the surge of ebooks to the self publishing explosion and the growing popularity of audiobooks Book Wars provides a comprehensive and fine grained account of technological disruption in one of our most important and successful creative industries Like other sectors publishing has been thrown into disarray by the digital revolution The foundation on which this industry had been based for 500 years the packaging and sale of words and images in the form of printed books was called into question by a technological revolution that enabled symbolic content to be stored manipulated and transmitted quickly and cheaply Publishers and retailers found themselves facing a proliferation of new players who were offering new products and services and challenging some of their most deeply held principles and beliefs The old industry was suddenly thrust into the limelight as bitter conflicts erupted between publishers and new entrants including powerful new tech giants who saw the world in very different ways The book wars had begun While ebooks were at the heart of many of these conflicts Thompson argues that the most fundamental consequences lie elsewhere The print on paper book has proven to be a remarkably resilient cultural form but the digital revolution has transformed the industry in other ways spawning new players which now wield unprecedented power and giving rise to an array of new publishing forms Most important of all it has transformed the broader information and communication environment creating new challenges and new opportunities for publishers as they seek to redefine their role in the digital age This unrivalled account of the book publishing industry as it faces its greatest challenge since Gutenberg will be essential reading for anyone interested in books and their future

The future of Inflight Entertainment in Europe, according to passenger expectations: Why Airlines should embrace Consumer Technology Jasmin Schawalder, 2014-04-01 Consumerization passengers toting their tablets laptops smartphones and e readers on planes has forced airlines to re think Should they continue to invest heavily into Inflight Entertainment IFE systems or just concentrate on offering Wi Fi and power in the cabin The goal of this research was to define the IFE offer of the future Four barriers that split the world into

the three regions Europe Asia and USA in terms of IFE development were identified the cultural the commercial the technological and the legal barrier This book focuses on Europe which lags mostly behind with IFE out of these three regions For example as opposed to the US no major European airline offers inflight Wi Fi widely on its network and in contrast to leading Middle Eastern airlines none offers inflight live TV or the usage of mobile phones without restriction like on the ground The target was to define IFE from a consumer perspective To capture the latter the author evaluated consumer satisfaction methodologies and decided to go with the Kano approach which categorizes alternatives of a product or service in this case IFE in must be attractive and indifferent elements A representative online survey revealed movies and power to be must be TV and Wi Fi to be attractive and the rest e books music games and duty free onboard to be indifferent elements of IFE The majority of people indicated that they would pay for movies and Wi Fi but not for power supply TV or other content Differently said content wise passengers only insisted in the supply of movies for the rest they expected the airline to provide Internet and power so they themselves could get the content Further sub groups were analysed people within the sample with mutual characteristics like gender travel frequency or ownership of smart devices So was music on a plane a must for women and owners of iPhones were more willing to pay for apps than others Overall country of residence travel purpose leisure or business and flight duration long vs short haul were the greatest dividers re IFE requirements

Transgenerational Media Industries Derek Johnson, 2019-11-12 Within corporate media industries adults produce children s entertainment Yet children presumed to exist outside the professional adult world make their own contributions to it creating and posting unboxing videos for example that provide content for toy marketers Many adults meanwhile avidly consume entertainment products nominally meant for children Media industries reincorporate this market disrupting participation into their strategies even turning to adult consumers to pass fandom to the next generation Derek Johnson presents an innovative perspective that looks beyond the simple category of kids media to consider how entertainment industry strategies invite producers and consumers alike to cross boundaries between adulthood and childhood professional and amateur new media and old Revealing the social norms reproductive ideals and labor hierarchies on which such transformations depend he identifies the lines of authority and power around which legacy media institutions like television comics and toys imagine their futures in a digital age Johnson proposes that it is not strategies of media production but of media reproduction that are most essential in this context To understand these critical intersections he investigates transgenerational industry practice in television co viewing recruitment of adult comic readers as youth outreach ambassadors media professionals identification with childhood the branded management of adult fans of LEGO and the labor of child YouTube video creators These dynamic relationships may appear to disrupt generational and industry boundaries alike However by considering who media industries empower when generating the future in these reproductive terms and who they leave out Johnson ultimately demonstrates how their strategies reinforce existing power structures This book
