Editing and Publishing e-Books Nicolae Sfetcu, **HCI and Usability for Education and Work** Andreas Holzinger, 2008-11-19 The Workgroup Human Computer Interaction Usability Engineering HCI UE of the Austrian Computer Society OCG serves as a platform for interdisciplinary change research and development. While human computer interaction HCI traditionally brings together psychologists and computer scientists usability engineering UE is a software engineering discipline and ensures the appropriate implementation of applications. Our 2008 topic was Human Computer Interaction for Education and Work HCI4EDU culminating in the 4th annual Usability Symposium USAB 2008 held during November 20-21 2008 in Graz Austria <http://usab.symposium.tugraz.at> As with the field of Human Computer Interaction in Medicine and Health Care HCI4MED which was our annual topic in 2007 technological performance also increases exponentially in the area of education and work. Learners teachers and knowledge workers are ubiquitously confronted with new technologies which are available at constantly lower costs. However it is obvious that within our e Society the knowledge acquired at schools and universities while being an absolutely necessary basis for learning may prove insufficient to last a whole life time. Working and learning can be viewed as parallel processes with the result that lifelong learning LLL must be considered as more than just a catch phrase within our society it is an undisputed necessity. Today we are facing a tremendous increase in educational technologies of all kinds and although the influence of these new technologies is enormous we must never forget that learning is both a basic cognitive and a social process and cannot be replaced by technology. **Human-Computer Interaction: Users and Contexts of Use** Masaaki Kurosu, 2013-07-03 The five volume set LNCS 8004-8008 constitutes the refereed proceedings of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas NV USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII

2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human computer interaction addressing the following major topics: identity, privacy and trust, user studies, interaction for society and community, HCI for business and innovation.
