The Remington Registry of Outstanding Professionals 2011-2012 J Alex Ficarra,2012-09-11 Undoubtedly growing up during the Vietnam War water gate and gas shortages can have a profound effect on a child Also being the son of immigrant parents most certainly can lead to a traumatizing clash of cultures and the understanding of right and wrong With that being said the Remington Company gave me the honor of a lifetime by letting me express my thoughts in unison with telling the brilliant stories of professionals around the world As I wrote endlessly 24 hours a day I realized that our world is full of hope and real promise I realized that it wasn't about war ideology and the pursuit of global domination I realized that in the pages of this great book great things were about to happen if only these stories can be made public I realized that I had the opportunity of a lifetime by expressing the Humanitarian attributes that these professionals continually made After many years of writing I realized that the Remington Company had a distinct and noble purpose and perhaps we could not change the present but we could certainly try to change our future With that we created our Mentorship Program which gets these prolific stories out to the children We wrote the stories with zest but never crossed the line of respect or dignity We wished to capture the hearts of our audience and prove to them that giving was not an option but more so our duty as life forms on our planet Today our book has a theme Inspiring the youth of America This theme was our way of telling the world Lets hold hands and prepare our children for a better life today I continue to write for the Registry My life has irrevocably changed for the better I volunteer for any thing all the time I enjoy moments of quiet and the appreciation of our environment I read these biographies in amazement as everyone else does and it never seems to get uneventful Either way I sincerely hope you enjoy these biographies and use them to strengthen your spirit and confidence about our existence as a species on this planet I patiently wait for divine intervention in order to write my next biography and am happy to serve the brilliant members of the Remington Registry of Outstanding Professionals

Reflections and Opinions of a Mental Health Professional Henry Claude Barbot,2013-01-15 Reflection and opinion of a mental health professional is a collection of dynamic episodes that I have encountered during my 20 years working with the human mind This literary work identified the impact of the devastation which is inflicted to individuals suffering from mental illnesses and disorders Sharing my insight I have utilized poetry as the platform to discuss how mental illnesses can create havoc in every day life My goal is to introduce the mental agony suffering and distress in a less complex manner so people from different social backgrounds can relate Poetry has a way of capturing one's interest by deceitfully challenging their intellect to further examine the beauty of what was read For the fearful that stray from reading about such dark somber tales I hope to enlighten them to reach within themselves and unveil any secrets that may be dormant or buried in the unconscious part of their mind The Book is indeed about the product of my twenty years of practice as a Psychiatrist including the three years I spent as a resident in the Howard University Hospital Psychiatry Residency Training Program Twenty years that had an imprint and really marked me as a human being and a physician who has been blessed and honored by the privilege of working with the human mind

have been information processing behavior therapy Constructivist psychology and dynamic psychotherapy Each of these sources have added color shading and depth to the CT model What was originally uni dimensional in terms of the CT focus on depression has become multidimensional as the CT model has been applied to virtually every patient population treatment setting and therapy context CT must now be seen as a general model of psychotherapy that with modifications can be applied to the broad range of clinical problems and syndromes What has tied these various applications of CT together is the emphasis on a strong grounding in cognitive theory a commitment to empirical support and a dedication to broadening the model
