Cognitive and Metacognitive Problem-Solving Strategies in Post-16 Physics Ronald Mazorodze, Michael J. Reiss, 2019-09-20. This book reports on a study on physics problem solving in real classrooms situations. Problem solving plays a pivotal role in the physics curriculum at all levels. However, physics students' performance in problem solving all too often remains limited to basic routine problems with evidence of poor performance in solving problems that go beyond equation retrieval and substitution. Adopting an action research methodology, the study bridges the research/practical divide by explicitly teaching physics problem solving strategies through collaborative group problem solving sessions embedded within the curriculum. Data were collected using external assessments and video recordings of individual and collaborative group problem solving sessions by 16-18 year olds. The analysis revealed a positive shift in the students' problem solving patterns both at group and individual level. Students demonstrated a deliberate, well planned deployment of the taught strategies. The marked positive shifts in collaborative competences, cognitive competences, metacognitive processing and increased self efficacy are positively correlated with attainment in problem solving in physics. However, this shift proved

to be due to different mechanisms triggered in the different students Problem Solving and Comprehension Arthur Whimbey, Jack Lochhead, 1999 Like previous editions this volume shows how to increase analytical thinking and problem solving skills leading to improved performance on tests academic courses and in jobs requiring analytic and problem solving skills **Analytical Thinking**, **Problem-solving in Groups** Mike Robson, 2002 This new edition of Mike Robson's best selling guide to the pitfalls techniques and processes of group problem solving has been updated to reflect the changes that have happened in continuous improvement and group and team working There are new materials on virtual groups as well as the processes of managing and facilitating groups *Novel Approaches for Studying Creativity in Problem-Solving and Artistic Performance* Philip Fine, Amory H.
