

ORGAN SYSTEMS

The human body is either studied by regions or by organ systems. This book uses the organ system approach in which individual organs (such as bones) are grouped into the larger organ systems (for example, the skeletal system). Typically eleven organ systems are described. The **skeletal system** consists of all of the bones of the body. Examples are the femur and the humerus. The **nervous system** consists of the nerves, spinal cord, and brain while the **lymphatic system** consists of lymph glands, conducting tubes called **lymphatics**, and organs such as the **spleen**. The term *immune system* is more of a functional classification

and will not be treated as a separate system here. The **muscular system** consists of individual skeletal muscles as organs such as the **pectoralis major** and **deltoid**. Label the organ systems underneath each illustration and label the selected organs by using the terms available. When you finish, select different colors for each organ system and color them in.

Organ System	Organ	Organ	Organ
Skeletal system	Femur	Humerus	Brain
Nervous system	Nerves	Spinal cord	
Lymphatic system	Lymph nodes	Spleen	
Muscular system	Pectoralis major	Deltoid	

c. _____

j. _____

g. _____

m. _____

Answer Key:

- a. Humerus
- b. Femur
- c. Skeletal
- d. Brain
- e. Spinal cord
- f. Nerves
- g. Nervous
- h. Spleen
- i. Lymph nodes
- j. Lymphatic
- k. Deltoid
- l. Pectoralis major
- m. Muscular

Anatomy And Physiology Coloring Workbook Answer Key

Chapter 3

Kalyani Premkumar

Anatomy And Physiology Coloring Workbook Answer Key Chapter 3:

The Massage Connection Kalyani Premkumar, 2004 This textbook is focused on the anatomy and physiology needs of massage therapy students and practitioners It gives extensive coverage of the major body systems integumentary skeletal muscular and nervous crucial for massage therapy It also provides an overview of other body systems so students have a well rounded understanding of anatomy and physiology Midwest

Human Anatomy & Physiology Coloring Workbook Paul D. Anderson, 2008-04-25 This valuable student resource is intended for use in the undergraduate human anatomy and physiology class The latest edition of Human Anatomy and Physiology Coloring Workbook is designed to help students learn introductory anatomy and physiology and is organized to complement the leading texts in the field Virtually every structure of the human body typically studied in an introductory course is examined Chapters are short concise and complete enabling the student to master smaller sections of information in a cohesive manner 2009 292 pages

Anatomy Coloring Workbook I. Edward Alcamo, 2003 Designed to help students gain a clear and concise understanding of anatomy this interactive approach is far more efficient than the textbook alternatives Students as well as numerous other professionals have found the workbook to be a helpful way to learn and remember the anatomy of the human body

Physiology Coloring Workbook Kenneth Axen, Kathleen Vermitsky Axen, 1997 Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes Written and illustrated by experts who are both research scientists and teachers it features 250 striking original illustrations that will give students a clear and enduring understanding of physiology Learning interactively through coloring thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks Physiological processes are fully explained and complex subjects are approached through the gradual introduction of simple drawings The authors employ a logical and consistent use of color to convey information for example arterial blood is always red whereas venous blood is blue and capillary blood is violet Each lesson includes clearly displayed labels and specific coloring instructions This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology biology nursing physical therapy and rehabilitation medical technology nutrition physical education allied health and health sciences The 250 plates in the book are organized in the following sections Homeostasis The Cell Transport Mechanisms Nervous System Muscle Cardiovascular System Renal System Respiratory System Gastrointestinal System Metabolism Endocrine System Reproduction
