BRS Gross Anatomy Kyung Won Chung, Harold M. Chung, 2011-05-27 Presents detailed information and diagrams about human anatomy with review questions and answers and a comprehensive examination **Gross Anatomy** Kyung Won Chung, 2005 Now in its updated Fifth Edition BRS Gross Anatomy is the first of the books in the Board Review Series to assume a primary role as a course review and textbook for medical students in first year anatomy courses Written in a concise bulleted outline format this well illustrated text offers 500 USMLE style review questions answers and explanations and features comprehensive content and upgraded USMLE Step 1 information Gross Anatomy William J.L.

Felts, 2012-12-06 This is not a textbook Instead it contains what the author judges necessary to cope with questions relating to Gross Anatomy in board and licensure examinations Although material that has appeared recently on Part I National Board Examinations is covered simply listing and answering such questions certainly would not prepare you for the myriad possible alternatives Because of your successful background in anatomy the approaches used in a first year course are not necessary here Recall review and synthesis are the goals Please examine the entire book now to understand its organization and content and how they may serve your needs Throughout text is kept to a minimum The style size and boldness of type were chosen to aid the quick recognition of important items The illustrations essentially adaptations from blackboard drawings used by the author in reviews support the text in certain areas However the number of illustrations sufficient to make this an independent resource would defeat our purpose I assume you will consult your favorite atlas as you review and that you are experienced enough now to relate your reading to your own body A general table of contents follows this preface detailed tables of content precede individual chapters **Anatomy** Raymond E. web the enthalpy change of neutralisation is defined as the enthalpy change when solutions of an acid and alkali react together to produce one mole of water for example HCl(aq) + NaOH(aq) → NaCl(aq) + H₂O(aq) you can see that one mole of water is produced when one mole of HCl or one mole of NaOH reacts
