The Burning Answer Keith Barnham, 2014-05-15 Our civilisation stands on the brink of catastrophe Our thirst for energy has led to threats from global warming nuclear disaster and conflict in oil rich countries We are running out of options Solar power Keith Barnham argues is the answer In this eye opening book he shows how a solar revolution is developing based on one of Einstein's lesser known discoveries one that gave us laptop computers and mobile phones An accessible guide to renewable technology and a hard hitting critique of the arguments of solar sceptics The Burning Answer outlines a future in which the fuel for electric cars will be generated on our rooftops It is above all an impassioned call to arms to join the solar revolution before it's too late

Synthesis of Adequate Mathematical Descriptions of Physical Processes Yurii Menshykov, 2020-08-11 For effective use of the results of computational calculations it is necessary that the computational schemes used correspond to real physical processes so that the schemes are adequate The issue of adequacy is currently poorly understood and there are also no generally accepted criteria of adequacy This book is the first to address the questions of constructing adequate mathematical descriptions of physical processes and their reasonable use in the future for various purposes It proposes two adequacy criteria quantitative and qualitative and describes several possible algorithms for synthesis of cases when the physical process is composed of a system of ordinary differential equations or a mathematical model in algebraic form The algorithms described here will be useful for specialists in areas where methods of mathematical modeling are used such as mechanics

unification to be developed based on current theories of quantum gravity including string theory In addition I support the views of some scientists and philosophers that currently too much resources are being consumed on the idea of developing quantum gravity theories and in particular string theory to include general relativity and to unify gravity with other forces as long as science does not impose such research programs

What levels of explanation in the behavioural sciences? Giuseppe

Boccignone,Roberto Cordeschi,2015-07-03 Complex systems are to be seen as typically having multiple levels of organization For instance in the behavioural and cognitive sciences there has been a long lasting trend promoted by the seminal work of David Marr putting focus on three distinct levels of analysis the computational level accounting for the What and Why issues the algorithmic and the implementational levels specifying the How problem However the tremendous developments in neuroscience knowledge about processes at different scales of organization together with the complexity of today cognitive theories suggest that there will hardly be only three levels of explanation Instead there will be many different degrees of commitments corresponding to the different granularities from high level behavioural models to low level neural and molecular models of the cognitive research program For instance Bayesian approaches that are usually advocated for formalizing Marr s computational level and rational behaviour have even been adopted to model synaptic plasticity and axon guidance by molecular gradients As a result we can consider the behavioural scientist as dealing with models at a multiplicity of levels The purpose of this Research Topic in Frontiers in Theoretical and Philosophical Psychology is to promote an approach to the role of the levels and explanation and models which is of interest for cognitive scientists neuroscientists psychologists behavioural scientists and philosophers of science
