Principles and Measurements in Environmental Biology F I Woodward, J E Sheehy, 2017-05-04 Principles and Measurements in Environmental Biology aims to provide an understanding of some important physical principles and their application in biology. The book also aims to describe how instruments utilizing these principles can be used to measure biological and environmental processes and their interactions. This book covers the effects of the environment on biological organisms, the application of theories of radiation kinetic theory, gas laws and diffusion in biology and water and its properties. The relation of plants with atmosphere near the ground is also discussed. This book also presents sampling techniques, the computation of errors used in the interpretation of data, the use of different devices and data gathering and its practical applications. This text is for students, researchers and professionals and experts in biology who wish to understand the mentioned principles in physics, its mathematical aspects and their applications in the field. **Rice Genetics I (In 2 Parts)**

- Proceedings Of The International Rice Genetics Symposium Stephen J Banta, 2008-04-03 The Rice Genetics Collection of past symposia and other selected literature contains nearly 4 400 pages of searchable information on rice genetics and cytogenetics published by the IRRI and its partners since 1964. In addition to the five genetics symposia held at 5 year intervals since 1985, the collection contains classic publications that kicked off significant reporting on these subjects in the early 1960s. This collection is a comprehensive and historical documentation on the subject of rice genetics spanning 45 years of research and scholarly work. Held in 1985 and published the following year, Rice Genetics I contains 77 chapters from various contributors on topics dealing with rice genetic research including systematics and evolution, varietal diversity and reproductive barriers, karyotype, polyploids and trisomics, linkage maps, genetics of morphological and physiological traits, genetics of stress tolerance, disease resistance, insect resistance and quantitative traits, cytoplasmic male sterility and fertility, restoration, mutagenesis, tissue and cell culture and genetic engineering. **Pakistan Journal of Zoology**, 2007
