3 Star Hotel Project Report:

The Report: Qatar 2015 Oxford Business Group, 2015-04-22 Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades. Home to the world's largest non-associated gas field, the country is the world's fourth largest producer of dry natural gas and the largest producer of liquefied natural gas, with hydrocarbons revenues forming the bulk of national income as a result. Although the drop in global energy prices has impacted export revenues, rigorous economic diversification drives in recent years have paid dividends, and in 2015 non-hydrocarbons growth reached 7.7% compared to a 0.1% contraction for hydrocarbons growth during the same period. The country's financial sector has continued to evolve, Islamic banking in particular has witnessed significant progress. Meanwhile, as the country gears up to host several important sporting events in the coming years, most notably the 2022 FIFA World Cup, numerous big ticket infrastructure builds continue to expand the construction sector. Inclusive Cities Kalpana Markandey, B.

Srinagesh, 2014-01-01 The present study is an effort to delve into the housing market in Hyderabad where a gap between the demand and supply is very obvious. It is found that while the houses of the upper and upper middle class continue to boom, the middle class is found wobbling for want of housing. The lower echelons of the socio-economic strata again have some amount of assistance by way of governmental schemes to provide housing. The shift from independent houses to multistoried complexes is also very much evident in Hyderabad over a period of time. The recommendations that flow out from this study are that land meant for housing the underprivileged should be supported and funds at low rates of interest should be provided for construction purposes. Home loan rates should be lowered as also the Income Tax exemption limit on home loan interest repayment. Development of integrated township in the area which can also house information technology firms can be taken up. The development of the township can be undertaken in the private public partnership. The poor can be provided access to safe drinking water and drainage. Also pollution control and personal safety in slums can help the poor. This will cut down the health costs of the less privileged. Inclusiveness in housing can be brought about by providing reasonably priced housing and also by guarding rental housing and ensuring that people are not displaced due to reasons beyond their control. This is apart from providing a well-knit society more so that which is assorted from the religious, cultural and caste point of view, giving a multi-cultural touch to the society which will be healthy, tolerant and nationalistic.
