Piping Systems; Electrical and Electronics Prints; Architectural and Structural Steel Drawings , Chapter 1 BLUEPRINTS
When you have read and understood this chapter you should be able to answer the following learning objectives Describe
blueprints and how they are produced Identify the information contained in blueprints Explain the proper filing of blueprints
Blueprints prints are copies of mechanical or other types of technical drawings The term blueprint reading means
interpreting ideas expressed by others on drawings whether or not the drawings are actually blueprints Drawing or
sketching is the universal language used by engineers technicians and skilled craftsmen Drawings need to convey all the
necessary information to the person who will make or assemble the object in the drawing Blueprints show the construction
details of parts machines ships aircraft buildings bridges roads and so forth BLUEPRINT PRODUCTION Original drawings
are drawn or traced directly on translucent tracing paper or cloth using black waterproof India ink a pencil or computer
aided drafting CAD systems The original drawing is a tracing or master copy These copies are rarely if ever sent to a shop or
site Instead copies of the tracings are given to persons or offices where needed Tracings that are properly handled and
stored will last indefinitely The term blueprint is used loosely to describe copies of original drawings or tracings One of the
first processes developed to duplicate tracings produced white lines on a blue background hence the term blueprint Today
however other methods produce prints of different colors The colors may be brown black gray or maroon The differences are
in the types of paper and developing processes used A patented paper identified as BW paper produces prints with black
lines on a white background The diazo or ammonia process produces prints with either black blue or maroon lines on a white
background Another type of duplicating process rarely used to reproduce working drawings is the photostatic process in
which a large camera reduces or enlarges a tracing or drawing The photostat has white lines on a dark background
Businesses use this process to incorporate reduced size drawings into reports or records The standards and procedures
prescribed for military drawings and blueprints are stated in military standards MIL STD and American National Standards
Institute ANSI standards The Department of Defense Index of Specifications and Standards lists these standards it is issued
on 31 July of each year The following list contains common MIL STD and ANSI standards listed by number and title that
concern engineering drawings and blueprints Blueprint Reading and Sketching United States. Bureau of Naval
