3 Identifying Research Problem By Gall Borg And Gall:

Doing Effective Fieldwork Elia Shabani Mligo, 2013-03-13 We live in a context of change whereby postmodernity shapes our understanding and our searching for truth Postmodernity dictates not only what kind of results we obtain in our researches but also on the ways we use to search for truth This means that postmodernity dictates the ways we do research in various disciplines the ways we use to analyze the research results and the ways we use to communicate the findings Postmodernity is the paradigm in which we are greatly concerned What is the place of rules of research research ethics selection of the problem and designing of research as we consider the context whereby nothing absolute can be envisaged How should one review the literature to suit this postmodern understanding of reality How should one argue his or her case This book is designed to help students in higher learning institutions learn qualitative research methods in classrooms or by themselves It moves students and researchers from modern ways of understanding doing and communicating qualitative research towards postmodern challenges and promises In this case the book is worthy reading to every serious student and researcher who seeks to equip oneself to the current issues of qualitative research methodology **ACEIVE 2019**

Sriadhi, Ernesto Silitonga, Zulkifli Matondang, M. Dominic Mendoza, Tansa Trisna Astono Putri, Robbi Rahim, 2019-11-16 As an annual event 3rd Annual Conference of Engineering and Implementation on Vocational Education ACEIVE 2019 continued the agenda to bring together researcher academics experts and professionals in examining selected theme by applying multidisciplinary approaches In 2019 this event will be held in 16 November at La Polonia Hotel and Convention The conference from any kind of stakeholders related with Education Information Technology Engineering and Mathematics Each contributed paper was refereed before being accepted for publication The double blind peer reviewed was used in the paper selection **Research Issues in Learning Disabilities** Sharon Vaughn, Candace S. Bos, 2012-12-06 In this chapter we

described issues in conducting intervention research with students with learning disabilities on the secondary level We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications Finally we described several research designs that we have found useful in conducting classroom intervention research There is a great deal more to conducting intervention research of course than experimental or quasi experimental design Intervention strategies likely to be effective must be identified relevant literature must be reviewed experimental materials must be developed and cooperative schools teachers parents and students must be located Nevertheless inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and

practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities
