management monitoring and pharmacotherapy examining the neurological problems most frequently seen in intensive care and describes the various types of neurosurgery and critical features of the management of patients General issues are discussed across the textbook such as cardiac care fluids and electrolytes nutrition and monitoring as well as more specific conditions and complications including elevated intracranial pressure seizures and altered mental states Listening to an injured brain is not easy It takes knowledge dedication and understanding of the critically ill patient and their family Textbook of Neurointensive Care Volume 2 Perioperative Management Monitoring Pharmacotherapy provides the reader with a detailed resource for studying this most complex area of medicine It is thus essential reading for all trainees and professionals in critical care neurosurgery anesthesia and neurology

When Doctors Kill Joshua A. Perper, Stephen J. Cina, 2010-06-14 It would come as no surprise that many readers may be shocked and intrigued by the title of our book Some especially our medical colleagues may wonder why it is even worthwhile to raise the issue of killing by doctors Killing is clearly an ethical to the Art and Science of Medicine which is geared toward easing pain and suffering and to saving lives rather than smothering them Doctors should be a source of comfort rather than a cause for alarm Nevertheless although they often don't want to admit it doctors are people too Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people In most cases fortunately the positive traits are dominant and doctors do more good than harm While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet Concurrently doctors and allied scientists have delved into the deep secrets of the body and mind mastering the anatomy and physiology of the human body even mapping the very molecules that make us who we are But make no mistake a person is not simply an elegant biological machine to be marveled at then dissected
