Computer Science Stanisław Krajewski, Stephen Krajewski, 2007 This volume honors Professor Andrzej Grzegorzczuk the
 nestor of Polish logicians on his 85th anniversary The editors would like to express the respect and sympathy they have for
 him His textbook The Outline of Mathematical Logic has been published in many editions and translated into several
 languages It was this textbook that introduced many of us into the world of mathematical logic Professor Grzegorzczuk has
 made fundamental contributions to logic and to philosophy His results mainly on hierarchy of primitive recursive functions
 known as the Grzegorzczuk hierarchy are of fundamental importance to theoretical computer science In particular they were
 precursory for the computational complexity theory The editors would like to stress that this special publication celebrates a
 scientist who is still actively pursuing genuinely innovative directions of research Quite recently Andrzej Grzegorzczuk gave a
 new proof of undecidability of the first order functional calculus His proof does not use the arithmetization of Kurt G del In
 recognition of his merits the University of Clermont Ferrand conferred to Professor Andrzej Grzegorzczuk the Doctorat
 Honoris Causa The work and life of Professor Andrzej Grzegorzczuk is presented in the article by Professors Stanisław
 Krajewski and Jan Wolenski The papers in this collection have been submitted on invitational basis Algorithms - ESA '93
 Thomas Lengauer, 1993-09-21 Symposium on Algorithms ESA 93 held in Bad Honnef near Bonn in Germany September 30
 October 2 1993 The symposium is intended to launch an annual series of international conferences held in early fall covering
 the field of algorithms Within the scope of the symposium lies all research on algorithms theoretical as well as applied that is
 carried out in the fields of computer science and discrete applied mathematics The symposium aims to cater to both of these
 research communities and to intensify the exchange between them The volume contains 35 contributed papers selected from

List Decoding of Error-Correcting Codes Venkatesan Guruswami, 2004-11-29 This monograph is a thoroughly revised and extended version of the author's PhD thesis which was selected as the winning thesis of the 2002 ACM Doctoral Dissertation Competition Venkatesan Guruswami did his PhD work at the MIT with Madhu Sudan as thesis adviser Starting with the seminal work of Shannon and Hamming coding theory has generated a rich theory of error correcting codes This theory has traditionally gone hand in hand with the algorithmic theory of decoding that tackles the problem of recovering from the transmission errors efficiently This book presents some spectacular new results in the area of decoding algorithms for error correcting codes Specifically it shows how the notion of list decoding can be applied to recover from far more errors for a wide variety of error correcting codes than achievable before The style of the exposition is crisp and the enormous amount of information on combinatorial results polynomial time list decoding algorithms and applications is presented in well structured form

Graphs and Order Ivan Rival, 2012-12-06 This volume contains the accounts of the principal survey papers presented at GRAPHS and ORDER held at Banff Canada from May 18 to May 31 1984 This conference was supported by grants from the N A T O Advanced Study Institute programme the Natural Sciences and Engineering Research Council of Canada and the University of Calgary We are grateful for all of this considerable support Almost fifty years ago the first Symposium on Lattice Theory was held in Charlottesville U S A On that occasion the principal lectures were delivered by G Birkhoff O Ore and M H Stone In those days the theory of ordered sets was thought to be a vigorous relative of group theory Some twenty five years ago the Symposium on Partially Ordered Sets and Lattice Theory was held in Monterey U S A Among the principal speakers at that meeting were R P Dilworth B Jonsson A Tarski and G Birkhoff Lattice theory had turned inward it was concerned primarily with problems about lattices themselves As a matter of fact the problems that were then posed have by now in many instances been completely solved
