

**Carnegie Mellon University**  
Project Director, Randy Pausch (pauusch@cmu.edu)

Computer Science enrollment's dropped 25% last year. In a country that is increasingly dependent on computing, it is critical that we reverse this trend. Introductory Computer Science courses often draw examples and assignments from the business computing and systems building domains. These courses are intended to ground computer science concepts in a domain that makes the problems relevant to students, yet many students do not begin to see the relevance of their computer science classes until their sophomore and junior years. Rather than relying on business and systems building examples, we have created a programming environment that allows students to learn basic computer science while creating animated movies and simple video games where students control the behaviors of 3D objects and characters in a virtual world. All is freely available and open source.

Alke has been formally shown to help at-risk students (those with a weak math background and/or no prior programming experience) succeed in Computer Science<sup>10</sup>. At-risk students who take an Alke class either prior to or concurrently with C51 perform as well as students who are not at-risk, and substantially better than other at-risk students. Frankie Hall has published a textbook based on Alke for college-level introductory programming.

| Performance of at-risk students: | Grade<br>Ex. C51 | Score<br>C52 ? |
|----------------------------------|------------------|----------------|
| Without ARI                      | C                | 43%            |
| With ARI                         | E                | 33%            |

In Alice, students construct programs by dragging and dropping files that represent words in a programming language. Alice removes the possibility for syntax errors, a common source of frustration for beginning programmers. Students can watch their programs execute, which enables students to see what they have made mistakes. Unlike many programming environments for novices, Alice allows students to gain experience with all the programming constructs typically taught in programming courses.

The screenshot shows the Microsoft Dynamics CRM 4.0 interface. The top navigation bar includes the 'New' button, which is highlighted with a red box and the number 1. The main area displays a list of records, with the first record highlighted in blue and labeled with a red box and the number 2. The left-hand pane shows the 'New' button, which is highlighted with a red box and the number 3. The bottom pane shows the 'New' button, which is highlighted with a red box and the number 4.
