, Practical Industrial Data Communications Deon Reynders, Steve Mackay, Edwin Wright, 2004-11-10 The objective of this book is to outline the best practice in designing installing commissioning and troubleshooting industrial data communications systems In any given plant factory or installation there are a myriad of different industrial communications standards used and the key to successful implementation is the degree to which the entire system integrates and works together With so many different standards on the market today the debate is not about what is the best be it Foundation Fieldbus Profibus Devicenet or Industrial Ethernet but rather about selecting the most appropriate technologies and standards for a given application and then ensuring that best practice is followed in designing installing and commissioning the data communications links to ensure they run fault free The industrial data communications systems in your plant underpin your entire operation It is critical that you apply best practice in designing installing and fixing any problems that may occur This book distills all the tips and tricks with the benefit of many years of experience and gives the best proven practices to follow The main steps in using today s communications technologies involve selecting the correct technology and standards for your plant based on your requirements doing the design of the overall system installing the cabling and then commissioning the system Fiber Optic cabling is generally accepted as the best approach for physical communications but there are obviously areas where you will be forced to use copper wiring and indeed wireless communications This book outlines the critical rules followed in installing the data communications physical transport media and then ensuring that the installation will be trouble free for years to come The important point to make is that with today s wide range of protocols available you only need to know how to select install and maintain them in the most cost effective manner for your plant or factory knowledge of the minute details of the protocols is not necessary An engineer s guide to communications systems using fiber optic cabling copper cabling and wireless technology Covers selection of technology and standards system design installation of equipment and cabling commissioning and maintenance Crammed with practical techniques and know how written by engineers for engineers *Programmable Logic Controllers* S. Balanced Automation Systems Luis M. Camarinha-Matos,Hamideh Afsarmanesh,2013-06-05 Towards Balanced Automation The concept Manufacturing industries worldwide are facing tough challenges as a consequence of the globalization of economy and the openness of the markets Progress of the economic blocks such as the European Union NAFTA and MERCOSUR and the global agreements such as GATT in addition to their obvious economic and social consequences provoke strong paradigm shifts in the way that the manufacturing systems are conceived and operate To increase profitability and reduce the manufacturing costs there is a recent tendency towards establishing partnership links among the involved industries usually between big industries and the networks of components suppliers To benefit from the advances in technology similar agreements are being established between industries and universities and research institutes Such an open tete cooperation network may be identified as an extended enterprise or a virtual enterprise In fact the manufacturing process is no more carried out by a single enterprise rather each enterprise is just a node that adds some value a step in the manufacturing chain to the cooperation network of enterprises The new trends create new scenarios and technological challenges especially to the Small and Medium size Enterprises SMEs that clearly comprise the overwhelming majority of manufacturing enterprises worldwide Under the classical scenarios these SMEs would have had big difficulties to access or benefit from the state of the art technology due to their limited human financial and material resources
