This book looks at the convergent nature of technology and its relationship to the field of photogrammetry and 3D design
This is a facet of a broader discussion of the nature of technology itself and the relationship of technology to art as well as an
examination of the educational process In the field of technology influenced design based education it is natural to push for
advanced technology yet within a larger institution the constraints of budget and adherence to tradition must be accepted
These opposing forces create a natural balance in some cases constraints lead to greater creativity than freedom ever can
but in other cases the opposite is true This work offers insights into ways to integrate new technologies into the field of
design and from a broader standpoint it also looks ahead raising further questions and looking to the near future as to what
additional technologies might cause further disruptions to 3D design as well as wonderful creative opportunities 3D
